Approved by the World Agricultural Outlook Board

June 12, 2001

NOTE: Projections are based on economic analysis, normal weather, trends, and judgment. Because planting of spring crops is still underway in the Northern Hemisphere and remains several months away in the Southern Hemisphere, these projections are highly tentative. Substantial variation may result from weather developments, economic factors, and policy changes. National Agricultural Statistics Service (NASS) forecasts are used for U.S. winter wheat. For other U.S. crops, the March 30 NASS Prospective Plantings report is used for planted acreage, and methods used to project harvested acreage and yield are noted on each table.

WHEAT: Projected 2001/02 ending stocks of wheat are down 6 million bushels from last month as a smaller crop and increased use more than offset increased carryin stocks. Forecast winter wheat production is down 20 million bushels from last month because of lower yields. Projected food use is up 10 million bushels. The projected 2001/02 price range is unchanged at \$2.75 to \$3.35 per bushel.

Forecast 2000/01 ending stocks of wheat are up 25 million bushels, with exports down 35 million bushels but food use up 10 million. Expected food use is higher than last month for both 2000/01 and 2001/02 because recently released mill grind estimates by the Bureau of the Census were larger than expected.

Projected global 2001/02 production is down slightly from last month as reductions for China, Australia, Canada, Turkey, and the United States more than offset increases for Ukraine, Eastern Europe, and North Africa. The smaller crop is expected to lead to larger imports by China, but this will be largely offset by smaller imports by Eastern Europe and North Africa. On the export side, smaller crops are expected to reduce export prospects for Australia, Canada, and Turkey. Also, prospective exports are reduced for Kazakstan. Exports are increased for Ukraine, Eastern Europe, and Argentina. Projected global 2001/02 ending stocks are down from last month as reductions for China more than offset small increases for a number of countries. China's 2001/02 ending stocks are reduced because of the smaller 2001 crop and reduced carryin stocks. Carryin stocks reflect a downward revision in the 2000 crop based on recently released Government crop estimates.

COARSE GRAINS: The outlook for U.S. 2001/02 feed grains is for larger supplies and use, but lower ending stocks and higher prices. Projected 2001/02 production is unchanged from last month, but supplies are higher due to increased forecast beginning stocks. However, projected use is up more than supplies, leaving slightly smaller 2001/02 ending stocks.

Projected 2001/02 ending stocks of corn are down 25 million bushels from last month as

larger exports more than offset the increased beginning stocks. Projected exports are up 75 million bushels due to reduced competition. The price range is up 5 cents on each end to \$1.70 to \$2.10 per bushel, compared with an unchanged \$1.80 to \$1.90 for 2000/01.

Expected 2000/01 ending stocks of corn are up 50 million bushels, but sorghum stocks are down 10 million bushels. Corn exports are reduced 50 million bushels but sorghum exports are up 15 million bushels.

Projected global 2001/02 coarse grain production and ending stocks are down from last month, largely due to a 10-million-ton reduction in China's corn crop. Other production changes include larger barley crops in Ukraine, North Africa, and Eastern Europe but smaller barley production in the EU. With a sharply lower corn crop, China's corn exports are reduced 2 million tons. This is offset by a slight reduction in projected global imports and larger exports by the United States and South Africa. China accounts for most of the reduction in projected global 2001/02 coarse grain ending stocks.

RICE: No changes are made on the U.S. supply side for 2000/01 or 2001/02. The all-rice export projections for 2000/01 and 2001/02 are unchanged from last month; however, rough rice exports for both years are lowered 2 million cwt to 25 million cwt while milled rice exports are raised 2 million cwt to 58 million cwt and 51 million cwt, respectively. The pace of rough rice exports in 2000/01 has slowed in recent weeks and is expected to maintain the slower pace for the remainder of the marketing year. Rough rice exports are expected to be strong in 2001/02, but not as large as projected earlier. Ending stocks for 2001/02 are unchanged at 21.9 million cwt. The season-average price range for 2001/02 is unchanged at \$5.25 to \$5.75 per cwt compared to a revised estimate of \$5.65 per cwt for 2000/01.

Projected global 2001/02 rice production is lowered 1 percent from last month based largely on a recalculation of a historical trend using a revised estimate of China's 2000/01 production. No changes are made on the use side for 2001/02. Ending stocks in 2001/02 are lowered 4.7 million tons. World production and ending stocks are lowered in 2000/01 based largely on a downward revision in China's crop. Global imports and exports in 2000/01 are also lowered. China's 2000/01 rice crop is estimated at 131.54 million tons, down nearly 1.5 million tons from last month based on official data from China. Rice production is also lowered in Iran and Taiwan. China's 2000/01 exports are lowered to 1.8 million tons based on a slower-than-expected pace to date. Import estimates for 2000/01 are lowered for Indonesia, Iran, and Iraq. Historical revisions are made to Iran's consumption and ending stocks back to 1972/73.

OILSEEDS: U.S. oilseed production for 2001/02 is projected at a record 92.2 million tons, unchanged from last month. Soybean production is forecast at 2,985 million bushels, or 81.2 million tons. U.S. soybean export prospects are increased 15 million bushels to a record 995 million bushels based on indications of stronger import demand. U.S. soybean crush is raised 20 million bushels to 1,645 million bushels. The increase in crush is attributed to larger U.S. meal export prospects as competitors switch from meal exports to soybeans. Energy shortages in Brazil are expected to limit crush expansion slightly, while weak crush margins in Argentina are expected to slow crush gains. U.S. soybean oil export prospects for 2001/02 are increased from last month reflecting increased availabilities and strong import demand in South Asia. U.S. beginning stocks for 2001/02 are reduced 25 million bushels and ending stocks are lowered 60 million bushels, to 440 million bushels.

U.S. season-average soybean prices for 2001/02 are projected at \$3.90 to \$4.70 per bushel,

up 20 cents on the top of the range from last month based on improved prospects for exports of soybeans and products and reduced ending stocks. Soybean meal prices are projected at \$145 to \$175 per short ton, compared with \$169 per ton estimated for 2000/01. Soybean oil prices are projected at 13.50 to 16.50 cents per pound, unchanged from last month.

Global oilseed production for 2001/02 is projected at a record 319 million metric tons, up about 9 million tons from 2000/01 and unchanged from last month. Global production for 2000/01 is estimated at 309.9 million tons, up 2.2 million tons from last month based on increases for soybeans, rapeseed, and peanuts. Brazil's soybean crop is raised 1 million tons to a record 37.5 million tons based on increased area and record yields. China's rapeseed crop is increased 0.4 million tons to 11.4 million tons. China's peanut crop is increased 0.9 million tons to a record 14.4 million tons. Partially offsetting declines include a reduction of 0.4 million tons in India's peanut crop.

Global soybean trade prospects for 2000/01 are raised 1.2 million tons this month based on strong China imports, which are raised 1 million tons to 11.5 million tons. Exports from South America are up 1.1 million tons this month.

For 2000/01, U.S. soybean exports are increased 5 million bushels to a record 995 million bushels. U.S. soybean crush for 2000/01 is increased 20 million bushels this month based on a higher soybean meal export prospects. U.S. soybean meal exports are raised 0.4 million short tons to 7.3 million tons as South American crushing gains slow and importers like Indonesia take more from the United States. U.S. ending stocks for 2000/01 are lowered to 270 million bushels.

SUGAR: Projected U.S. sugar supply and use for fiscal year 2001/02 are unchanged from last month, except for an increase in carryin stocks. For 2000/01, beet sugar production is increased 80,000 short tons, raw value, based mainly on improved recovery of sugar from stored 2000-crop sugarbeets. No changes are made to use. The estimated 2000/01 end-of-season stocks-to-use ratio is 19.3 percent, up from 18.6 percent last month.

LIVESTOCK, POULTRY, AND DAIRY: Forecast total U.S. meat production in 2001 is reduced slightly as increased broiler and pork production is more than offset by lower beef output. The increase for broilers reflects revised estimates for first-quarter broiler production and stronger production in the second quarter. Pork production is raised as slaughter weights in the second quarter are expected to be higher. The beef production forecast is lower because feedlot performance continued to be weak through most of the second quarter, resulting in lower-than-expected cattle slaughter and sharply lower average slaughter weights. Projected meat production for 2002 is unchanged this month.

Cattle and hog prices in 2001 are forecast slightly higher than last month. Retail demand continues to remain strong and second-quarter retail prices are expected to be at or near record levels. Fed cattle supplies will continue to tighten through the year as sharply lower placements are expected in the second half and cattle remain on feed longer to achieve Choice grade. Despite relatively high hog prices, producers remain cautious about expanding and hog numbers are expected to grow gradually through the remainder of the year. The quarterly *Hogs and Pigs* report, to be released June 29, will provide an indication of longer-term farrowing plans.

Milk production forecasts for 2000/01 and 2001/02 are unchanged this month. Production in 2000/01 is forecast to remain slightly below last year as an expected recovery in milk per cow

in the summer will not be sufficient to overcome falling cow numbers. However, production likely will turn up in 2001/02 as output per cow grows and the rate of decline in cow numbers slows.

Milk prices in 2000/01 are forecast slightly higher as product prices remain firm. The forecast 2000/01 Class III price is increased to \$12.05 to \$12.25 per cwt. The Class IV price is raised to \$13.60 to \$13.90 per cwt due to stronger-than-expected butter prices. The all-milk price is forecast to be \$14.25 to \$14.45 per cwt. Class IV prices in 2001/02 are raised fractionally from last month as product prices are expected to remain firm into the first part of the year. Nonfat dry milk prices will remain above CCC purchase prices and removals of nonfat dry milk through December 2001 are expected to decline from last month's forecast. The all-milk price for 2001/02 is lowered slightly to \$13.60 to \$14.60 per cwt.

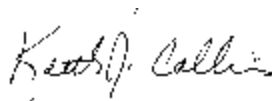

COTTON: This month's 2001/02 U.S. projections include higher beginning stocks and lower domestic mill use, resulting in ending stocks of 6.6 million bales, 300,000 bales above last month. Projected production is unchanged at 18.8 million bales. Domestic mill use is reduced 200,000 bales to 8.8 million bales, as recent mill use rates and additional mill closings have resulted in diminished expectations. The export projection is unchanged at 9.0 million bales.

World 2001/02 estimates reflect higher beginning stocks, larger production, and slightly lower consumption relative to last month. World production is projected higher based on indications of favorable planting progress for the season to date. World consumption is reduced marginally due to a decrease for the United States. With these changes, ending stocks are now projected at 38.4 million bales, up 3 percent from last month.

For 2000/01, U.S. ending stocks are raised 100,000 bales this month as a reduction in mill use is partially offset by an increase in exports. Both of these changes reflect recent activity levels. In addition, revisions to the foreign estimates result in higher ending stocks estimates for Australia, China, Pakistan, Tanzania, and Turkey, partially offset by a reduction for India.

Approved by the Secretary of Agriculture and the World Agricultural Outlook Board, Gerald A. Bange, Chairperson, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees. Committee members are listed on page 5.

APPROVED:

KEITH J. COLLINS
ACTING SECRETARY OF AGRICULTURE

The next issue of this report will be released 8:30 a.m. ET on July 11, 2001.

The World Agricultural Supply and Demand Estimates (WASDE) report will be released 8:30 a.m. Eastern Time on the following dates in 2001: July 11, Aug. 10, Sep. 12, Oct. 12, Nov. 9, Dec. 11.

=====				

Note: Reliability calculations at end of report.

1/ Marketing year beginning September 1 for soybeans; October 1 for soybean oil and meal. 2/ Prices: soybeans, marketing year weighted average price received by farmers; for oil, simple average of crude soybean oil, Decatur; for meal, simple average of 48 percent, Decatur. 3/ Supply estimates and reported use through February, coupled with USDA's March 1 stocks estimate, indicate an above average residual. 4/ Based on October year crush estimate of 1,610 million bushels. *Planted acres are reported in March 31 Prospective Plantings. Harvested acres based on normal planted-to-harvested ratio. Projected yield based on U.S. trends since the mid-1980's.

1/ Fiscal years beginning Oct 1. Includes Puerto Rico. 2/ Historical data are from FSA, "Sweetener Market Data" except imports from U.S. Customs Service. 3/ Projections for 2001/02 are based on analyses by the Interagency Commodity Estimates Committee for sugar. 4/ Production by state for 2000/01 (projected 2001/02): FL 2,055 (2,060); HI 240 (270); LA 1,570 (1,675); TX 200 (165); PR 6 (15). 5/ Actual arrivals under the tariff rate quota (TRQ) with late entries, early entries, and TRQ overfills assigned to the fiscal year in which they actually arrived. The 2000/01 available TRQs assume shortfall of 65,000 tons. 6/ Quota exempt imports (for reexport, for polyhydric alcohol, sugar syrup under USHTS 1702904000, and high-duty). 7/ Mostly reexports. 8/ Transfer to sugar containing products for reexport, for nonedible alcohol, and feed. 9/ For 1999/2000, includes residual statistical discrepancies. 10/ For 2000/01 and 2001/02, includes only sugar owned by the Commodity Credit Corporation, as of June 8, 2001. Season-ending CCC stocks will be a function of market and program developments.

: Avg. farm price 4/						
	:	45.0	52.4	5/	5/	

Note: Reliability calculations at end of report.

1/ Upland and extra-long staple; marketing year beginning August 1. Totals may not add due to rounding. 2/ Based on Bureau of Census data. 3/ Reflects the difference between the previous season's supply less total use and ending stocks based on Bureau of Census data. 4/ Cents per pound. The 2000/2001 price is a weighted average price for upland cotton for August-April. 5/ USDA is prohibited by law from publishing cotton price projections. * Planted area reported in March 30 Prospective Plantings. Projected harvested area based on 1991-2000 average acreage abandonment by State. Projected yield based on 1991-2000 average yield by State.

Note: Public Law 106-78, signed October 22, 1999, requires the Secretary of Agriculture to estimate and report the U.S. upland cotton season-ending stocks-to-use ratio, excluding projected raw cotton imports but including the quantity of raw cotton imports that has been imported during the marketing year. Pursuant to this requirement, the estimated ratio for 2000/01 is 37.0 percent.

1/ Data based on local marketing years except for Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil and EU. 4/ India, China and Pakistan.

1/ Marketing year beginning October 1. 2/ Milk equivalent, milkfat basis.

3/ Includes commercial exports. 4/ Includes products exported under the Dairy Export Incentive Program. 5/ Basic Formula Price through Dec. 31, 1999;

Class III price beginning Jan. 1, 2000 6/ Milk of average fat test. Does not reflect any deductions from producers as authorized by legislation.

Note: Tables on pages 31-33 present a 20-year record of the differences between the June projection and the final estimate. Using world wheat production as an example, changes between the June projection and the final estimate have averaged 15.6 million tons (2.9%) ranging from -32.2 to 29.6 million tons. The June projection has been below the estimate 12 times and above 8 times.

WASDE SUBSCRIPTIONS

Mail subscriptions cost \$50.00; 2- and 3-year subscriptions are available. Call 1-800-999-6779 or 703-605-6220, 8:30 a.m.-5:00 pm. ET, or write ERS-NASS, 5285 Port Royal Road, Springfield, Virginia 22161. This report is also available from the Government Printing Office. Call 202-783-3238 or write Superintendent of Documents, GPO, Washington, D.C. 20402. For GPO subscription inquiries, call 202-512-1806.

ELECTRONIC ACCESS

This report and other USDA releases are posted electronically by release date at www.usda.gov/news/calindex.htm. To view a report, click the month of release, then the report title.

You can now download this report in both ascii text format and pdf (Adobe Acrobat) format at www.usda.gov/oce/waob/wasde/wasde.htm. Acrobat files can be viewed or printed in their original form, page by page.

For instructions on retrieving the WASDE report by fax, call (202) 694-5700 from the handset of a fax machine and follow voice prompts to retrieve document 66900. For information on e-mail subscriptions or other questions about the WASDE report, call (202) 720-5447.

**World Agricultural Supply and Demand Estimates
WASDE-375 - June 12, 2001**

**U.S. Department of Agriculture
Office of the Chief Economist**

Approved by the World Agricultural Outlook Board

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
