September 14, 2001

WHEAT: Projected U.S. 2001/02 ending stocks of wheat are up 16 million bushels from last month due to higher production and reduced food use. Forecast production is 6 million bushels above last month because of higher spring wheat yields. Projected food use is down 10 million bushels from last month and only slightly above last year because of an expected improvement in milling yields from the unusually low levels in 2000/01. With better milling yields, less grain is needed to obtain the same amount of flour. The projected price range is reduced 20 cents on the high end to \$2.70 to \$3.10 per bushel because of lower-than-expected prices during the first quarter of the marketing year.

Global 2001/02 wheat supply, use, and ending stocks are up from last month, led by larger crops in Russia, Ukraine, Syria, India, Brazil, and several other countries. The larger production will lead to expanding exports by a number of these countries. Also, Brazil's larger crop is expected to reduce its import needs. However, global imports are up from last month because of a smaller crop in Turkey, increased purchases of wheat for feeding by South Korea, and expanding consumption in Nigeria. Smaller crops in Australia and Canada will reduce exports and ending stocks, while the smaller EU crop reduces expected domestic use and ending stocks.

COARSE GRAINS: Smaller supplies and stable use are expected to drop U.S. 2001/02 ending stocks of corn 98 million bushels below last month's projection. Forecast production is down 28 million bushels from last month due to lower yields. In addition, forecast carryin stocks are down 65 million bushels because of increased 2000/01 exports. Total use for 2001/02 unchanged from last month as an increase in projected domestic use offsets slightly lower exports. The projected price range for corn is up 5 cents on each end to \$1.95 to \$2.35 per bushel.

Global 2001/02 coarse grain production is projected up, largely because of increases in barley crops in Russia, Ukraine, and the EU; rye production in Russia and the EU; and sorghum in Australia. Foreign corn production, however, is down from last month due to reductions for Canada, Russia, and Ukraine. A 3-million-ton increase from last month in projected exports by China only results in a small decline in U.S. 2001/02 export prospects. With Canada's corn and barley crops down sharply, forecast corn imports by Canada are up 1.2 million tons from last month while exports are down 700,000 tons. In addition, corn imports are projected higher for a number of other countries, more than offsetting smaller expected imports by South Korea because of increased purchases of wheat for feeding.

RICE: U.S. 2001/02 total rice supplies are projected at a record 245.5 million cwt, up 6 percent from last month and 7 percent above 2000/01. Rice production in 2001/02 is projected at a record 206.3 million cwt, 4 percent above last month and 8 percent above 2000/01. U.S. planted and harvested area estimates are increased. Harvested area is estimated at 3.290 million acres, 2 percent above last month and 8 percent above 2000/01. U.S. average yield for 2001/02 is estimated at 6,272 pounds per acre, up 2 percent from last month, but down slightly from last year's record. Long-grain production is estimated at a record 159.7 million cwt, 4 percent above last month and up 24 percent from 2000/01. Combined medium- and short-grain production is estimated at 46.7 million cwt, up 3 percent from last month but 25 percent below 2000/01.

The August 31 *Rice Stocks* report estimated August 1 rice stocks at 28.4 million cwt (rough-equivalent basis), up 22 percent from last month's projection and 3.5 percent above 2000/01. Rough rice stocks are placed at 22 million cwt and milled rice stocks at 4.4 million cwt. Domestic and residual use for 2001/02 is lowered 2.5 percent, based in part on revised 2000/01 domestic and residual use. U.S. exports in 2001/02 are projected at 86 million cwt, up 2 percent from last month and 2000/01. Ending stocks are projected at 38.5 million cwt, up 58 percent from last month, and 38 percent above 2000/01. Stocks would be the largest since 1992/93. The season-average price projection is lowered \$1.10 per cwt on each end to \$3.75 to \$4.25 per cwt.

Global 2001/02 rice production and consumption are lowered from last month while trade and ending stocks are little changed. The decrease in global rice production is due primarily to smaller crops projected for China and Egypt, partially offset by increases for the United States, India, and Australia.

OILSEEDS: U.S. oilseed stocks for 2001/02 are projected at 8.0 million metric tons, down 1.2 million tons from last month and up only 0.4 million tons from last year as beginning stocks and production are revised down. Soybean production is forecast at a record 2,834 million bushels, off 33 million bushels from last month based on lower yield prospects, particularly in the upper Midwest where crop conditions have been below normal. Other oilseed crops are little changed, with increases for peanuts partially offset by a small decline in cottonseed. Soybean export prospects are reduced 5 million bushels this month due to reduced supply availabilities. Soybean crush is increased 5 million bushels based on stronger domestic soybean meal use prospects. Soybean oil ending stocks for 2001/02 are raised sharply from last month, due mostly to larger beginning stocks. Census revisions added about 200 million pounds to 2000/01 inventories. Reductions in U.S. soybean oil exports and domestic consumption for 2000/01 also contributed to the larger stocks for 2000/01. Domestic soybean oil use is cut 100 million pounds for both 2000/01 and 2001/02.

U.S. season-average soybean prices for 2001/02 are projected at \$4.40 to \$5.40 per bushel, up 5 cents from last month, and compare to a preliminary \$4.55 per bushel for 2000/01. Prices are similar to 1985/86 when ending stocks in the three principal exporting countries were near the 21 million metric tons indicated for 2000/01, although current U.S. stocks are less than half of the record U.S. carryover at the end of 1985/86.

WASDE-378-3

Soybean meal prices are forecast at \$165 to \$185 per short ton, up \$10 on the low end and \$5 on the high end compared with last month. Soybean oil prices are projected lower this month at 15.50 to 18.50 cents, but still are above last year's average of 14.15 cents per pound.

Global oilseed production for 2001/02 is projected at a record 316.1 million metric tons, down 2.2 million tons from last month, but up 6.4 million tons from 2000/01. U.S. oilseed production is forecast at 88.2 million tons, off 0.9 million tons from last month. Foreign production is off 1.3 million tons to a record 227.9 million tons this month. Most of the drop is due to a combined 1-million-ton reduction in sunflowerseed production for Russia and Ukraine, where crop conditions have been extremely poor. Wet planting conditions gave way to extremely hot, dry conditions leading up to harvest. Other significant changes include a 0.5-million-ton reduction in Canada's soybean crop and a 0.2-million-ton reduction in their canola crop.

SUGAR: Projected U.S. sugar production for fiscal year 2001/02 is decreased 60,000 short tons, raw value, compared with last month, due to lower forecast sugarcane area for harvest in Louisiana. Imports of sugar from sugar syrups under USHTS 1702904000 are decreased 95,000 tons due to a U.S. Appeals Court ruling that is expected to reclassify the product. The 2001/02 TRQ has not been announced.

For 2000/01, beet sugar production is increased 50,000 tons, based on higher-than-anticipated summer output from sugarbeet molasses and improved prospects for September production from 2001-crop sugarbeets. Domestic food and beverage use is lowered 50,000 tons due to continued weakness in deliveries. The ratio of season-ending stocks to use is 19.8 percent, compared with 18.7 percent last month.

LIVESTOCK, POULTRY, AND DAIRY: Projected total meat production is reduced for 2001, but raised for 2002. Beef production in 2001 is forecast higher this month, but is offset by lower forecast pork and turkey production. The August *Cattle on Feed* report showed continued strong feedlot placements resulting in more beef production during the last part of this year and into next year. For 2002, beef production is projected higher in the first quarter as recent lightweight placements are marketed. Forecast pork production in 2001 is reduced because of the slower-than-expected pace of hog slaughter and lighter hog weights this quarter. The *Quarterly Hogs and Pigs* report, to be released on September 28, will provide further information on producer intentions for the sector. Poultry meat production for 2001 is fractionally lower on reduced turkey output.

Cattle prices in 2001 and 2002 are forecast lower as larger supplies of cattle continue to pressure prices. Hog prices are raised slightly for 2001 and 2002. Poultry prices are little changed from last month.

U.S. beef exports for 2001 and 2002 are forecast lower than last month due to continued expected weakness in shipments to major Asian markets. Broiler meat exports in 2001 and 2002 are raised as current exports, especially to Russia, outpace earlier expectations. Demand for U.S. broilers is expected to remain strong next year.

Forecast milk production in 2001/02 is slightly lower than last month as slower growth in milk per cow more than offsets the slower rate of decline in cow numbers. Forecasts for 2000/01 and 2001/02 Class III and Class IV prices are raised from last month as dairy product prices remain strong. The 2001/02 all milk price forecast is raised to \$13.70 to \$14.50 per cwt.

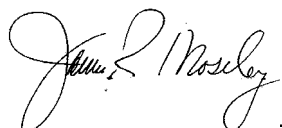

COTTON: Projected U.S. 2001/02 ending stocks are raised this month due to larger beginning stocks and lower domestic mill use. Forecast cotton production is down marginally as lower production in the Delta is about offset by an increase in California. Domestic mill use is reduced 200,000 bales, based on diminished expectations of recovery in retail demand. With the export estimate unchanged at 9.0 million bales, ending stocks are raised 7.4 percent from August to 8.7 million bales.

Ending stocks for 2000/01 are raised to 6.0 million bales, nearly 500,000 bales above last month's USDA forecast. The change is based on a stocks survey by the Bureau of the Census.

World beginning stocks of cotton for 2001/02 are raised nearly 900,000 bales this month, primarily due to the increase for the United States. Beginning stocks in Indonesia, Turkey, and Pakistan are also higher and Tanzania is lower. Projected world production is raised slightly, as increases in China, Mali, and Syria are nearly offset by decreases in Australia, Brazil, and Sudan. World consumption is about unchanged, as lower projections for China and the United States are mostly offset by increases for Uzbekistan and Pakistan. Slight reductions in world imports and exports also are offsetting. World ending stocks are raised 1.2 million bales to 42.7 million bales.

Approved by the Secretary of Agriculture and the World Agricultural Outlook Board, Gerald A. Bange, Chairperson, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees. Committee members are listed on page 5.

1/ Fiscal years beginning Oct 1. Includes Puerto Rico. 2/ Historical data are from FSA, "Sweetener Market Data" except imports from U.S. Customs Service. 3/ Projections for 2001/02 are based on analyses by the September Crop Production and Interagency Commodity Estimates Committee for sugar. 4/ Production by state for 2000/01 (projected 2001/02): FL 2,055 (2,010); HI 240 (270); LA 1,570 (1,760); TX 207 (150); PR 0 (5). 5/ Actual arrivals under the tariff rate quota (TRQ) with late entries, early entries, and TRQ overfills assigned to the fiscal year in which they actually arrived. The 2000/01 available TRQs assume shortfall of 65,000 tons. 6/ Quota exempt imports (for reexport, for polyhydric alcohol, sugar syrup under USHTS 1702904000, and high-duty). 7/ Mostly reexports. 8/ Transfer to sugar containing products for reexport, for nonedible alcohol, and feed. 9/ Includes residual statistical discrepancies and expected Commodity Credit Corporation sales to ethanol producers. 10/ Includes only sugar owned by CCC (net of expected sales to ethanol producers), as of September 10, 2001. Season-ending CCC stocks will be a function of market and program developments.

Note: Reliability calculations at end of report.

1/ Upland and extra-long staple; marketing year beginning August 1. Totals may not add due to rounding. 2/ Based on Bureau of Census data. 3/ Reflects the difference between the previous season's supply less total use and ending stocks based on Bureau of Census data. 4/ Cents per pound for upland cotton, average for August-July. 5/ USDA is prohibited by law from publishing cotton price projections.

Note: Public Law 106-78, signed October 22, 1999, requires the Secretary of Agriculture to estimate and report the U.S. upland cotton season-ending stocks-to-use ratio, excluding projected raw cotton imports but including the quantity of raw cotton imports that has been imported during the marketing year. Pursuant to this requirement, the estimated ratio for 2001/02 is 51.0 percent.

Nonfat dry milk	449	690	560	540	175	170
Dry whole milk	12	34	3	3	0	0

Note: Totals may not add due to rounding.

1/ Marketing year beginning October 1. 2/ Milk equivalent, milkfat basis.

3/ Includes commercial exports. 4/ Includes products exported under the Dairy Export Incentive Program. 5/ Basic Formula Price through Dec. 31, 1999;

Class III price beginning Jan. 1, 2000. 6/ Milk of average fat test. Does not reflect any deductions from producers as authorized by legislation.

Note: Tables on pages 31-33 present a 20-year record of the differences between the September projection and the final estimate. Using world wheat production as an example, changes between the September projection and the final estimate have averaged 10.3 million tons (1.9%) ranging from -30.7 to 13.1 million tons. The September projection has been below the estimate 11 times and above 9 times.

WASDE SUBSCRIPTIONS

Mail subscriptions cost \$60.00; 2- and 3-year subscriptions are available. Call 1-800-999-6779 or 703-605-6220, 8:30 a.m.-5:00 pm. ET, or write ERS-NASS, 5285 Port Royal Road, Springfield, Virginia 22161. This report is also available from the Government Printing Office. Call 202-512-1800 or write Superintendent of Documents, GPO, Mail Stop SSOP, Washington, D.C. 20402. Internet: *bookstore.gpo.gov*. For GPO subscription inquiries, call 202-512-1806.

ELECTRONIC ACCESS

This report and other USDA releases are posted electronically by release date at www.usda.gov/news/calindex.htm. To view a report, click the month of release, then the report title.

You can now download this report in both ascii text format and pdf (Adobe Acrobat) format at www.usda.gov/oce/waob/wasde/wasde.htm. Acrobat files can be viewed or printed in their original form, page by page.

For instructions on retrieving the WASDE report by fax, call (202) 694-5700 from the handset of a fax machine and follow voice prompts to retrieve document 66900. For information on e-mail subscriptions or other questions about the WASDE report, call (202) 720-5447.

**World Agricultural Supply and Demand Estimates
WASDE-378 - September 14, 2001**

U.S. Department of Agriculture
Office of the Chief Economist

Approved by the World Agricultural Outlook Board

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
