WHEAT: Projected U.S. 2005/06 ending stocks of wheat are down 59 million bushels from last month due to smaller beginning stocks and lower production. Beginning stocks are down 14 million bushels with higher projected food use and exports for 2004/05. Forecast winter wheat production is 45 million bushels less than last month because of lower yields. Projected use is unchanged from last month but is down 131 million bushels from last year. The 2005/06 projected price range is \$2.65 to \$3.15 per bushel, up 10 cents on each end from last month compared with an estimated \$3.39 for 2004/05.

The 2005/06 global wheat outlook has shifted modestly from last month with projected production falling, imports increasing, and stocks declining. Foreign production is down 1.6 million tons due mostly to smaller crops in Australia (down 1.5 million), the EU-25, Argentina, India, and Morocco. These declines are partially offset by larger crops in Russia (up 2 million tons) and Turkey. Projected global imports are up fractionally, mostly due to larger imports by Morocco, Tunisia, and Nigeria. The pattern of global exports has shifted from last month with larger exports projected for Russia and Turkey and smaller exports for Australia, Argentina, and India. Global consumption rises fractionally due largely to increased wheat feeding in Russia. Global wheat stocks fall with the largest declines in the United States and Australia.

COARSE GRAINS: Except for small increases to U.S. barley exports and oat imports, no other changes are projected for 2004/05 feedgrains relative to last month. Similarly, the outlook for 2005/06 is unchanged from last month for production, use, and prices. The 2005/06 projected price range for corn is \$1.55 to \$1.95, compared with \$2.00 to \$2.10 for 2004/05.

The most noteworthy change in the global outlook for 2004/05 is in Brazil with a 2-million-ton reduction in the corn crop, lower imports, smaller feed use and exports, and a 0.4-million-ton drop in ending stocks. The global outlook for 2005/06 is for decreased coarse grains production, lower use, and a moderate drop in stocks relative to last month. Smaller crops are projected in Ukraine (down 1.5 million tons), Russia (down 1 million), Argentina and Australia (each down 0.5 million), and several other countries.

Global coarse grain use in 2005/06 is down fractionally with the largest declines occurring in Russia, Ukraine, and Australia. Consumption is up in Egypt, Iran, and Tunisia. Global imports are down slightly as smaller imports by Turkey, Russia, Indonesia, and Chile are only partially offset by larger imports by Egypt, Morocco, Brazil, and Iran. Exports from Argentina, Brazil, Ukraine, and Kazakhstan are lower while exports by the EU-25 and South Africa rise. Global ending stocks drop just over 2 million tons with the largest declines occurring in Russia, Ukraine, and Australia. Stocks are up in Iran, Egypt, Tunisia, and several other countries.

RICE: No changes are made on the supply side of the U.S. 2005/06 supply and use balance while only minor changes are made on the use side. The export projection is raised 1 million cwt to 121 million cwt because of an increase in the combined medium- and short-grain export projection. Tight supplies in Australia (medium-grain exporter), because of drought and below normal irrigation supplies, likely will translate into larger export opportunities for U.S. rice in markets in the Middle East and Oceania. The domestic and residual use projection is unchanged from a month ago. Ending stocks for 2005/06 are projected at 31.7 million cwt, 1 million cwt below last month. The season-average farm price range for 2005/06 is unchanged at \$7.20 to \$7.50 per cwt compared to \$7.20 to \$7.40 per cwt for 2004/05.

Slight changes are made to global supply and use projections for 2005/06. World production is projected at a record 410.4 million tons, up less than 100,000 tons from last month but 8.6 million tons above 2004/05. Global ending stocks in 2005/06 are projected at 67.3 million tons, the lowest stocks since 1982/83.

OILSEEDS: U.S. oilseed production for 2005/06 is projected at 89.2 million tons, unchanged from last month. Soybean production is forecast at 2,895 million bushels, or 78.8 million tons. A projected decrease in 2004/05 soybean ending stocks this month for South America is expected to provide increased U.S. export opportunities. As a result, 2005/06 U.S. soybean exports are increased 10 million bushels to 1,135 million bushels. Prospects for increased exports and reduced soybean supplies result in a slight decrease in soybean crush from last month. U.S. soybean ending stocks are projected at 255 million bushels, down 25 million bushels from last month.

The U.S. season-average soybean price for 2005/06 is projected at \$4.95 to \$5.95 per bushel, up 25 cents on both ends of the range. Soybean meal prices are projected at \$160 to \$190 per short ton, up \$10.00 on both ends of the range. Soybean oil prices are projected at 20.5 to 23.5 cents per pound, up 0.5 cents on both ends of the range.

Global oilseed production for 2005/06 is projected at 377.0 million tons, down 4.1 million tons (1 percent) from 2004/05. Foreign oilseed production is projected at 287.8 million tons, up 3.2 million tons from 2004/05. Global soybean production is projected to increase 3.4 million tons to a record 219.7 million tons. Although U.S. soybean production is expected to decline from last year's record level, a rebound in yields and production in Brazil will push South American soybean production to a record 108 million tons,

accounting for just below half of 2005/06 global production. The Brazilian soybean crop is projected at a record 62 million tons, up 17 percent from the drought-reduced 2004/05 crop. Global production of high-oil content seed is down 5 percent as lower rapeseed production is only partly offset by increased sunflowerseed production. Rapeseed production is projected lower for China, the EU-25, Canada, and India. Sunflowerseed production is higher for Ukraine as producers expand plantings from 2004/05.

Global protein meal consumption is projected to increase 3 percent in 2005/06, primarily due to gains for soybean meal. Protein meal consumption in China is projected to increase 8 percent, with a 15 percent increase in soybean meal more than offsetting decreased consumption of rapeseed and cottonseed meal. World soybean trade increases 7 percent to 65.6 million tons, nearly all of which is due to higher imports for China to a record 27.0 million tons. Global vegetable oil consumption is projected to increase 5 percent for 2005/06 led by gains for China, India, and the EU-25. Global oilseed crush is projected to increase 3 percent, and oilseed stocks are projected to increase 3.5 million tons to a record 58.2 million tons.

Changes for 2004/05 for the U.S. include increased soybean crush and exports and reduced ending stocks. Global soybean ending stocks are also reduced, reflecting the effect of reduced Brazil soybean production for 2003/04. The crop is reduced from 52.6 million tons to 50.5 million tons based on analysis of crush and trade statistics for the marketing year.

SUGAR: Projected U.S. sugar supply and use for fiscal year 2005/06 are unchanged from a month ago. Year-ending stocks are 759,000 tons.

LIVESTOCK, POULTRY, AND DAIRY: *NOTE:* Due to uncertainties as to the length of the bans on trade in ruminants and ruminant products because of the discovery of BSE in the United States and Canada, forecasts for 2005 and 2006 assume a continuation of policies currently in place among U.S. trading partners. It is assumed that the current delay in the implementation of the minimal-risk rule is temporary. Subsequent forecasts will reflect any announced changes.

The total U.S. meat production forecast for 2005 is increased slightly. Beef production is raised marginally, reflecting slightly higher slaughter in the second quarter. The pork production forecast is raised slightly because slaughter weights are expected to be heavier than previously projected as weights have been running higher so far this year. The *Quarterly Hogs and Pigs* report, scheduled for release June 24, will provide an indication of producer farrowing intentions into 2006. Broiler production is forecast higher than last month as production to date has been revised upward and increases in hatch and weights are expected to carry forward through the year. Egg production is forecast lower than last month as the growth of laying flocks has slowed. Egg production forecasts for 2006 are unchanged.

Livestock and poultry prices are forecast weaker in the second quarter of 2005 based on prices to date. Except for eggs, forecasts for other quarters of 2005 and 2006 are unchanged. Egg price forecasts are lower.

Milk production in 2005 and 2006 is forecast higher than last month as recent good returns are expected to result in increased cow numbers. The recent *Milk Production* report indicated that cow numbers are above 2004 and producers are expected to expand herds through 2006.

Larger supplies of milk are expected to pressure butter and cheese prices, but strong exports continue to support nonfat dry milk prices. The nonfat dry milk price forecasts for both 2005 and 2006 are raised, which helps support increased Class IV prices even in the face of lower butter price forecasts. The cheese price forecast is raised in 2005 because current cheese prices are higher than expected, resulting in a slightly higher Class III price. But the cheese price forecast for 2006 is reduced in the face of larger milk production, lowering the Class III price next year.

The all milk price for 2005 is slightly higher at \$14.80 to \$15.20 per cwt, but the 2006 forecast is lowered to \$13.05 to \$14.05 per cwt.

COTTON: This month's 2005/06 U.S. projections include larger beginning stocks that are more than offset by larger exports, leaving ending stocks marginally lower. The production forecast is unchanged from last month, as is domestic mill use. With larger U.S. supplies and slightly reduced foreign supplies, U.S. exports are raised 500,000 bales to a record 15.0 million, accounting for a slightly higher share of world trade relative to last month. Ending stocks are now projected at 6.2 million bales, or 30 percent of total use.

The 2005/06 world projections show only slight revisions from last month. World production of 106.2 million bales is reduced marginally, while consumption and trade are nearly unchanged. World ending stocks are projected lower by about just over 1.0 million bales to 44.1 million, due to reduced estimates of beginning stocks and production.

For 2004/05, U.S. exports are reduced 400,000 bales to 13.0 million based on slower than expected shipments to date, thereby raising ending stocks by a like amount. The lower U.S. exports are associated with a 1.5-million-bale reduction in estimated imports by China, also reflecting activity to date. Lower imports by China and Thailand in 2004/05 are partially offset by increases for India, Indonesia, Mexico, and Turkey.

U.S. domestic mill use is reduced 268,000 to 6.2 million bales in 2003/04, based on recent revisions by the Bureau of the Census. Ending stocks are unchanged.

Approved by the Secretary of Agriculture and the World Agricultural Outlook Board, Gerald A. Bange, Chairperson, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees. Committee members are listed on page 35.

APPROVED:

CHARLES F. CONNER
ACTING SECRETARY OF AGRICULTURE

The next issue of this report will be released at 8:30 a.m. ET on July 12, 2005.

In 2005, the *WASDE* report will be released on July 12, Aug. 12, Sept. 12, Oct. 12, Nov. 10, and Dec. 9.

1/ Fiscal years beginning Oct 1. Includes Puerto Rico. Historical data are from FSA, "Sweetener Market Data" except imports (U.S. Customs Service, Census Bureau). 2/ Production projections for 2005/06 are based on March 31 Prospective Plantings and trend yields. 3/ Actual arrivals under the tariff rate quota (TRQ) with late entries, early entries, and TRQ overfills assigned to the fiscal year in which they actually arrived. For 2005/06, includes only the U.S. commitment to the World Trade Organization to import a minimum quantity of raw and refined sugar, minus shortfall of 50,000 tons. The Secretary will establish the actual level of the TRQ at a later date. 4/ Includes sugar under the re-export and polyhydric alcohol programs. 5/ Includes high-tier and other. 6/ Transfers to sugar-containing products for reexport, and for nonedible alcohol and feed. 7/ Residual statistical discrepancies.

=====				

Note: Reliability calculations at end of report.

1/ Upland and extra-long staple; marketing year beginning August 1. Totals may not add due to rounding. 2/ Based on Bureau of Census data. 3/ Reflects the difference between the previous season's supply less total use and ending stocks based on Bureau of Census data. 4/ Cents per pound. The 2004/05 price is a weighted average price for upland cotton for August-April. 5/ USDA is prohibited by law from publishing cotton price projections. * Planted area reported in March 31 "Prospective Plantings." Projected harvested area based on 2002-2004 U.S. average abandonment. Projected yield per harvested acre based on 2002-2004 U.S. average yield per harvested acre.

Note: Public Law 106-78, signed October 22, 1999, requires the Secretary of Agriculture to estimate and report the U.S. upland cotton season-ending stocks-to-use ratio, excluding projected raw cotton imports but including the quantity of raw cotton imports that has been imported during the marketing year. Pursuant to this requirement, the estimated ratio for 2004/05 is 40.5 percent.

1/ Simple average of monthly prices calculated by AMS from NASS weekly average dairy product prices for class price computations. Details may be found at http://www.ams.usda.gov/dyfmos/mib/fedordprc_dscrp.htm. 2/ Annual Class III and Class IV prices are the simple averages of monthly minimum Federal order milk prices paid by regulated plants for milk used in the respective classes. All milk price is the simple average of monthly prices received by farmers for milk at average test. 3/ Does not reflect any deductions from producers as authorized by legislation.

Foreign Production Assessments. Preliminary foreign production assessments and satellite imagery analysis used to prepare the WASDE report are provided by the Production Estimates and Crop Assessment Division of FAS, Allen Vandergriff, Director.

Related USDA Reports. The WASDE report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the WASDE report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. See <http://www.usda.gov/oce/waob/related.htm> for an explanation of related reports.

Supply and Demand Database. The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <http://www.fas.usda.gov/psd/>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.

Note: Tables on pages 33-35 present a 24-year record of the differences between the June projection and the final estimate. Using world wheat production as an example, changes between the June projection and the final estimate have averaged 16.2 million tons (3.0%) ranging from -32.2 to 29.6 million tons. The June projection has been below the estimate 14 times and above 10 times.

1/ Final estimate for 1981/82-2003/04 is defined as the first November estimate following the marketing year and for 2004/05 last month's estimate. 2/ May not total 24 if projection was the same as final estimate. 3/ Includes corn, sorghum, barley, oats, rye, millet, and mixed grain. 4/ Global soybean supply and use projections for 2004/05 were initially released in June 2004. Therefore, an insufficient number of observations are available to provide meaningful reliability statistics for global soybean supply and use.

Interagency Commodity Estimates Committees ..	32
Reliability Tables	33
Electronic Access and Subscriptions	36

Electronic Access: Download the *WASDE* report <http://usda.mannlib.cornell.edu/>. Get a free e-mail subscription to the *WASDE* and other USDA crop reports at <http://usda.mannlib.cornell.edu>. Click on the "Reports by E-Mail" button to sign up.

Subscriptions: Call NTIS at 1-800-999-6779 or 703-605-6220. The Government Printing Office also sells subscriptions. See www.usda.gov/oce/waob/wasde/wasde.htm for more information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
