WHEAT: No changes are made to projected U.S. 2005/06 all wheat production, imports, domestic use, and exports; leaving ending stocks at 530 million bushels. Relative to last month, Hard Red Winter (HRW) wheat exports are up 5 million bushels, while Durum exports are down 5 million. HRW and Hard Red Spring (HRS) domestic use are lowered 3 and 2 million bushels respectively, but Durum domestic use is up 5 million. Ending stocks of HRW fall 2 million bushels to 173 million, 20 million less than the previous year. HRS ending stocks rise 2 million to 121 million bushels, but are 38 million less than the previous year. The projected 2005/06 price range is \$3.25 to \$3.50 per bushel, down 5 cents on the upper end from last month, compared with \$3.40 for 2004/05.

Global wheat production in 2005/06 is up nearly 5 million tons from last month; consumption rises nearly 2 million; exports and imports increase slightly; and ending stocks increase nearly 4 million. Foreign production rises due primarily to larger crops in Australia, Canada, China, Uzbekistan, and Kazakhstan. Projected global imports are up fractionally due to larger imports by Pakistan, Brazil, South Africa, and the Philippines. Imports by China are down 0.5 million tons to just 2 million, well below the previous year's imports of 6.75 million. Forecast exports rise for Australia, Canada, and Brazil but fall for Syria.

Consumption is up in a number of countries, with the largest month-to-month increases occurring in Pakistan, Brazil, Australia, Canada, and Uzbekistan. Due mostly to higher ending stocks in Australia, Canada, China, and Kazakhstan, global 2005/06 wheat ending stocks rise to 143.4 million tons, up 3.8 million from last month, but down nearly 7 million from the previous year.

COARSE GRAINS: Projected 2005/06 U.S. corn stocks rise from last month due to a drop in exports. No changes are made to projected U.S. 2005/06 corn production, imports, or domestic use. Corn exports are down 100 million bushels from last month due primarily to increased corn exports by China and Ukraine. Corn ending stocks are up 100 million bushels

to 2,418 million, 307 million higher than the previous year. The projected 2005/06 price range for corn is \$1.60 to \$2.00 per bushel, unchanged from last month, compared with \$2.06 for 2004/05.

Projected 2005/06 U.S. grain sorghum stocks rise from last month due to a drop in exports. No changes are made to projected U.S. 2005/06 grain sorghum production, imports, or domestic use. Grain sorghum exports are 170 million bushels, down 10 million bushels from last month due to smaller-than-expected purchases by Mexico and the smallest in over 30 years. Grain sorghum ending stocks are up 10 million bushels to 60 million bushels, 3 million higher than the previous year. Grain sorghum prices in 2005/06 are projected to average \$1.45 to \$1.85, unchanged from last month, compared with \$1.79 for 2004/05.

Projected 2005/06 barley imports decline 5 million bushels from last month while exports increase 5 million. Barley ending stocks fall 10 million bushels to 101 million, 27 million less than the previous year. This month, the projected range of barley prices is narrowed 5 cents on each end to \$2.35 to \$2.55, compared to \$2.48 for 2004/05. Projected 2005/06 oat imports decline 10 million bushels from last month and ending stocks fall 10 million bushels to 46 million, 12 million less than the previous year. This month, the projected range of oat prices is narrowed 5 cents on each end to \$1.50 to \$1.60, compared to \$1.48 for 2004/05.

The outlook for global coarse grains in 2005/06 is for larger production, increased consumption, slight changes in trade, and higher stocks relative to last month. Foreign production is up 7.4 million tons with the largest increases projected in China, Canada, and Australia. These gains are partially offset by smaller crops in South Africa and Kazakhstan. Foreign 2005/06 coarse grain consumption is up 3.2 million tons with large increases projected in Canada, Morocco, Iraq, and Iran as well as other countries. Consumption falls in Mexico and Kazakhstan. Global 2005/06 imports are little changed from last month. Imports are projected down for Canada and Mexico but up for Iran, Morocco, and several other countries. Global 2005/06 exports are up nearly 1 million tons from last month with large increases projected for China and Australia. In addition to the lower projected exports from the United States, exports decline for South Africa, Iraq, and Kazakhstan. Global 2005/06 ending stocks rise 5.4 million tons from last month with foreign stocks up nearly 3 million. The largest increases in foreign stocks occur in China, Canada, Australia, Romania, and Ukraine. Stock declines are projected for South Africa, Morocco, India, and several other countries.

RICE: Only minor changes are made to the U.S. 2005/06 rice supply and use projections from a month ago. On the supply side, imports are lowered 1 million cwt to 14 million cwt, due to a slower-than-expected import pace early in the marketing year. No changes are made on the use side. As a result, ending stocks are lowered 1 million cwt to 25.2 million cwt, which are down 12.5 million cwt from a year earlier. The season-average farm price is lowered 10 cents per cwt on each end to \$7.65 to \$7.95 per cwt and compares to \$7.33 per cwt in 2004/05.

Global 2005/06 rice production, imports, and ending stocks are raised from last month, while consumption and exports are nearly unchanged from a month ago. The increase in global rice production is due to larger crops projected for Australia, Pakistan, Thailand, and Turkey. Global imports are raised due primarily to increases for Indonesia, Malaysia, and Nigeria while imports for the United States were reduced slightly. Global exports are raised slightly from a

month ago with increases for Australia, Pakistan, and South Korea nearly offset by a reduction for Thailand. World rice ending stocks for 2005/06 are projected at 65.8 million tons, up 1.2 million tons from last month, but down 7.1 million tons from 2004/05, and the lowest stocks since 1982/83.

OILSEEDS: Total U.S. oilseed production is projected at 95.1 million tons, up slightly due to increased cottonseed production. Soybean exports are reduced 55 million bushels to 1,020 million bushels as competition from South American soybean exports continues to limit U.S. trade prospects, especially to EU-25 and China. U.S. export commitments (shipments plus outstanding sales) through early December are at the lowest level since 1998. With projected soybean crush unchanged, 2005/06 ending stocks are increased to 405 million bushels. Although soybean crush is unchanged, soybean oil production and ending stocks are raised based on a sharply higher oil extraction rate.

U.S. season-average soybean prices for 2005/06 are projected at \$5.00 to \$5.70 compared with \$4.95 to \$5.75 last month. Soybean meal prices are unchanged at \$155 to \$180 per short ton. Soybean oil prices are projected at 20.5 to 23.5 cents per pound, down 1.5 cents on each end of the range.

Global oilseed production for 2005/06 is projected at 387.0 million tons, up 1.7 million tons from last month. Foreign oilseed production accounts for most of the change with increases for rapeseed, sunflowerseed, and soybeans more than offsetting reductions for cottonseed. Canadian rapeseed production is raised 1.2 million tons to a record 9.7 million tons, based on the latest survey results from Statistics Canada. Canada's soybean crop is also increased this month based on the survey. Ukraine sunflowerseed production is increased 0.3 million tons to 4.6 million tons reflecting increased harvested area and yields. Other changes include higher rapeseed production for Australia and reduced cottonseed production for India.

Global oilseed trade is little changed this month with reduced U.S. soybean exports largely offset by increases for Brazil. Global oilseed ending stocks for 2005/06 are raised primarily due to increased soybean stocks in the United States and increased rapeseed stocks in Canada.

SUGAR: Projected U.S. sugar supply for 2005/06 is increased 728,000 short tons, raw value, from last month. Production is increased 146,000 tons, mainly due to higher beet sugar production, based on processors' reports compiled by the Farm Service Agency. Imports are increased 590,000 tons, mostly due to higher tariff rate quota (TRQ) imports. Shortfall in filling the TRQ is increased 15,000 tons. Imports of high-tier sugar from Mexico are increased 130,000 tons while other non-program imports are increased 25,000 tons. Use is unchanged and ending stocks are increased to 1.4 million tons, or 13.4 percent of use.

For 2004/05, revisions to preliminary year-end data from processors result in supply increasing 35,000 tons and use increasing 43,000 tons. Ending stocks are decreased to 1.35 million tons, or 12.8 percent of use.

LIVESTOCK, POULTRY, AND DAIRY: *NOTE:* Due to uncertainties as to the length of the bans on trade in ruminants and ruminant products because of the discovery of BSE in the

United States and Canada, forecasts for 2005 and 2006 assume a continuation of policies currently in place among U.S. trading partners. Subsequent forecasts will reflect any announced changes.

The total U.S. meat production forecasts for 2005 and 2006 are little changed from last month. Beef production is forecast fractionally lower in the fourth quarter because of the continued slow pace of cattle slaughter. But the decline in beef output is limited by heavier average carcass weights. In 2006, beef production is raised slightly as marketings pick up in the first quarter. Pork and poultry meat production forecasts are unchanged in both 2005 and 2006.

Forecast beef imports in 2005 are reduced because shipments from Oceania are expected to be lower than forecast last month. Beef imports in 2006 are lowered to reflect a continued slow pace of shipments. Beef exports in 2005 and 2006 are raised due to expected increased shipments to markets currently open to U.S. beef. This beef forecast still assumes that Asian markets, particularly Japan and Korea, remain closed to U.S. beef. Pork exports in 2005 are reduced slightly. Broiler exports in 2005 are reduced because third quarter shipments were lower than expected.

Forecast cattle prices for the fourth quarter 2005 are increased as supplies of Choice grade cattle remain tight. Prices in the first half of 2006 are also raised as cattle supplies remain relatively tight into 2006. The hog price for 2005 is increased because of recent stronger prices. This strength is expected to continue into next year, resulting in a slightly higher first quarter price. Broiler prices in 2005 and 2006 are reduced as current broiler prices have weakened.

Forecast milk production for 2005 and 2006 is slightly lower than last month. Compared with last month's forecast, the herds are reduced marginally, and the milk per cow growth rate is slightly lower. Relatively large supplies of butter are pressuring butter prices and forecast prices are reduced to reflect further pressure through early 2006. Cheese, nonfat dry milk, and whey price forecasts are raised from last month as demand is expected to remain firm. Class IV prices are lowered in 2005 but the Class III price is unchanged. The forecast for both 2006 Class III and Class IV prices are raised from last month. The all milk price for 2005 is forecast lower at \$15.10 to \$15.20 per cwt, but the 2006 forecast is raised to \$13.35 to \$14.15 per cwt.

COTTON: This month's U.S. forecasts for 2005/06 include higher production, exports, and ending stocks compared with last month. Production is raised 2 percent to a record 23.7 million bales, due mainly to increases for Texas and Georgia. Domestic mill use is unchanged and exports are raised 200,000 bales to a record 16.4 million bales. Ending stocks are raised 6 percent to 6.9 million bales.

The world 2005/06 forecasts include modest increases in all categories. Beginning stocks are raised for India and Pakistan, due to prior year adjustments. World production is slightly higher, as increases for the United States, Pakistan, Australia, Syria, and Burkina Faso more than offset reductions for India, Turkey, and others. Consumption is raised mainly in China, based on recent yarn production. World trade is also raised slightly as higher imports by China and Turkey are partially offset by lower imports by Pakistan. World ending stocks are forecast 1.5 percent above last month.

Approved by the Secretary of Agriculture and the World Agricultural Outlook Board, Gerald A. Bange, Chairperson, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees. Committee members are listed on page 32.

APPROVED:

**MIKE JOHANNNS
SECRETARY OF AGRICULTURE**

The next issue of this report will be released at 8:30 a.m. ET on January 12, 2006. In 2006, the *WASDE* report will be released on February 9, March 10, April 10, May 12, June 9, July 12, August 11, September 12, October 12, November 9, and December 11.

2006 Agricultural Outlook Forum: Prospering in Rural America

USDA invites you to attend the 2006 Agricultural Outlook Forum, February 16-17, 2006, in Arlington, Virginia. Among the Forum's speakers are Secretary Mike Johanns and other top officials, industry analysts, business leaders, farmers and ranchers, and experts in agriculture. The Forum offers more than 130 speakers along with numerous networking opportunities — 1,500 people are expected to attend.

For more information, visit: <http://www.usda.gov/oce/forum>

Note: Reliability calculations at end of report.

1/ Upland and extra-long staple; marketing year beginning August 1. Totals may not add due to rounding. 2/ Based on Bureau of Census data. 3/ Reflects the difference between the previous season's supply less total use and ending stocks based on Bureau of Census data. 4/ Cents per pound for upland cotton. 5/ Average price for August-October 2005. USDA is prohibited by law from publishing cotton price projections.

Note: Public Law 106-78, signed October 22, 1999, requires the Secretary of Agriculture to estimate and report the U.S. upland cotton season-ending stocks-to-use ratio, excluding projected raw cotton imports but including the quantity of raw cotton imports that has been imported during the marketing year. Pursuant to this requirement, the estimated ratio for 2005/06 is 31.4 percent.

1/ Data based on local marketing years except for Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil and EU. 4/ India, China and Pakistan.

1/ Simple average of monthly prices calculated by AMS from NASS weekly average dairy product prices for class price computations. Details may be found at http://www.ams.usda.gov/dyfmom/mib/fedordprc_dscrp.htm. 2/ Annual Class III and Class IV prices are the simple averages of monthly minimum Federal order milk prices paid by regulated plants for milk used in the respective classes. All milk price is the simple average of monthly prices received by farmers for milk at average test. 3/ Does not reflect any deductions from producers as authorized by legislation.

Foreign Production Assessments. Preliminary foreign production assessments and satellite imagery analysis used to prepare the WASDE report are provided by the Production Estimates and Crop Assessment Division of FAS, Allen Vandergriff, Director.

Related USDA Reports. The WASDE report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the WASDE report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. See <http://www.usda.gov/oce/waob/related.htm> for an explanation of related reports.

Supply and Demand Database. The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <http://www.fas.usda.gov/psd/>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.

Note: Tables on pages 33-35 present a 24-year record of the differences between the December projection and the final estimate. Using world wheat production as an example, changes between the December projection and the final estimate have averaged 3.8 million tons (0.7%) ranging from -10.2 to 6.1 million tons. The December projection has been below the estimate 16 times and above 8 times.
