WHEAT: U.S. wheat ending stocks for 2007/08 are projected at 307 million bushels, down 55 million bushels from last month, reflecting lower production and higher use as an increase in projected exports more than offsets lower projected feed and residual use. If realized, this year's ending stocks would be the lowest since 1948/49. Production is lowered 47 million bushels this month based on the latest production estimate from the *Small Grains Summary* report. Feed and residual use is projected 45 million bushels lower this month as strong export demand and higher prices are expected to limit wheat feeding during the remainder of the 2007/08 marketing year. Exports are raised 50 million bushels reflecting tighter world supplies and the strong pace of U.S. shipments and sales to date. The season-average farm price is projected at \$5.80 to \$6.40 per bushel, up 30 cents on each end of the range from last month and well above the record of \$4.55 per bushel in 1995/96.

Global wheat production for 2007/08 is projected down 5.8 million tons this month reflecting lower output in Australia, EU-27, and the United States, which more than offsets increases in Argentina, Canada, and FSU-12. Production for Australia is lowered 7.5 million tons as drought and heat that began in August continued through early October leaving crops, particularly in eastern Australia, with little moisture through the critical reproductive stages. Production is lowered 1.1 million tons in EU-27 based on updated government estimates. Production is raised 0.5 million tons for Argentina as timely September rains boosted soil moisture and higher prices encourage more fertilizer usage. Production in Canada is raised 0.3 million tons based on the latest official estimates. FSU-12 production is raised 3.3 million tons mostly reflecting better-than-expected spring wheat yields as good growing season moisture and extended good weather for harvest have boosted production prospects for Kazakhstan and Russia.

World imports, exports, and consumption for 2007/08 are all lowered this month as world supplies are projected 8.1 million tons lower. Imports are lowered 1.1 million tons reflecting a number of small changes to several countries as higher prices reduce demand. Exports are lowered 1.1 million tons as a sharp reduction in projected exports for Australia is only partly offset by higher expected shipments from Argentina, China, Kazakhstan, and the United States. Australia's exports are lowered 4.5 million tons reflecting lower production and prospects for tight ending stocks as that country suffers a second year of sharply curtailed production. Exports are raised 0.5 million tons each for Argentina and China. Exports for Kazakhstan are increased 1.5 million tons in line with the revised export estimate for 2006/07 based on recently available government data.

World wheat consumption for 2007/08 is projected 2.7 million tons lower this month. Wheat feeding is projected 1.7 million tons lower with the largest reductions expected for Australia, Canada, EU-27, and the United States. Partly offsetting is an increase in wheat feeding for Russia as higher production adds to available domestic feed supplies. Despite lower expected use, world ending wheat stocks are projected down 5.4 million tons from last month. At 107.0 million tons, 2007/08 world stocks would be the lowest since 1975/76.

COARSE GRAINS: Projected U.S. ending stocks of corn for 2007/08 are raised 322 million bushels this month on larger supplies and lower domestic consumption which more than offset an increase in projected exports. Production is forecast at 13.318 billion bushels, up just 10 million as an increase in area is nearly offset by lower forecast yields. Total corn supplies are projected at a record 14.6 billion bushels, based on slightly higher production and increased carryin as reported in the September *Grain Stocks* report. Feed and residual use is lowered 150 million bushels based on the slower rate of domestic use implied by September 1 stocks. Corn use for ethanol in 2007/08 is lowered 100 million bushels reflecting lower indicated plant capacity utilization and lower returns for ethanol producers due to recent declines in ethanol prices and continued strength in corn prices. Exports are projected 100 million bushels higher on tighter foreign grain supplies and strong export sales. At the projected 2.35 billion bushels, 2007/08 exports would be the highest in 18 years. The season-average farm price is projected at \$2.90 to \$3.50 per bushel, up 10 cents on both ends of the range reflecting continued strong cash prices supported by strong export demand and higher soybean and wheat prices.

Sorghum ending stocks for 2007/08 are lowered this month. Supplies are nearly unchanged with higher forecast production nearly offset by reduced beginning stocks reported in the September *Grain Stocks* report. Exports are raised 40 million bushels with strong demand from the EU-27 reflected in large outstanding export sales. Lower projected domestic sorghum use is partly offsetting as strong prices and higher exports limit sorghum feeding and processing use. The season-average sorghum price is projected higher in line with the increase in the corn price. Barley and oats prices are also raised this month on strong prices to date and tighter balance sheets that reflect lower carryin and production as reported in the September *Grain Stocks* and *Small Grains Summary* reports.

World coarse grain supplies are projected lower this month as foreign supplies decline on lower production. World coarse grain production is lowered 8.5 million tons with reductions in Australia, Brazil, China, EU-27, and Russia. Barley and oats production for Australia are lowered 1.8 million tons and 0.5 million tons, respectively, based on persistent dry weather during the growing season, particularly in the eastern growing areas. Brazil corn production is lowered 1.0 million tons reflecting lower expected area as delays to the start of the rainy season are expected to reduce the window for second crop planting. Corn production in China is projected 4.0 million tons lower as relatively localized drought has reduced production prospects in the western parts of the northeastern growing region. EU-27 barley, corn, and mixed grain production are all lowered this month as is barley production in Russia.

Global coarse grain imports and exports are both expected higher as reductions in foreign production are made up by higher U.S. exports. World imports are raised 2.5 million tons with the largest increase for EU-27 as tighter wheat supplies there boost coarse grain feeding and imports. Coarse grain exports are raised 2.7 million tons with increases for the United States partly offset by lower exports of barley, oats, and sorghum from Australia and lower corn exports from China. World coarse grain consumption is projected 7.6 million tons lower. Reduced corn and sorghum feeding in the United States accounts for more than half of this decline. With lower consumption, global coarse grain stocks are projected 3.1 million tons higher this month.

RICE: U.S. rice production in 2007/08 is forecast at 197.1 million cwt, about 3 percent above last month due to an increase in yield. Average yield is estimated at a record 7,215 pounds per acre, up 191 pounds from last month. Harvested area is unchanged at 2.73 million acres. Long-grain and combined medium- and short-grain production are both up from last month. All rice imports are unchanged at 20.5 million cwt. All rice exports are projected at 106 million cwt, up 6 million from a

month earlier. Long-grain exports are increased to 83 million cwt while combined medium- and short-grain exports are unchanged at 23 million. Ending stocks are projected at 26.2 million cwt, down 3 percent from last month. The season-average farm price is forecast at \$10.30 to \$10.70 per cwt, up 45 cents per cwt on both ends of the range, the highest since 1980/81.

Global 2007/08 rice supply and use are little changed from a month ago. World production is raised slightly, primarily because of increases for the United States and Brazil, which are nearly offset by declines for Australia, South Korea, and Russia. Global imports are raised mainly due to an increase for Australia. World exports are raised slightly from a month ago as projections are raised for the United States and China, and lowered for Australia. Ending stocks are lowered slightly from last month to 70.9 million tons due mainly to reductions for China and South Korea, which are nearly offset by increases for Brazil and Thailand.

OILSEEDS: U.S. oilseed ending stocks for 2007/08 are nearly unchanged from last month as increased supplies are offset by higher exports and crush. Oilseed supplies are forecast higher this month mainly due to production increases for sunflowerseed, peanuts, and cottonseed. Soybean production is forecast down 21 million bushels to 2.598 billion due to this month's acreage reductions. Planted and harvested area are both lowered 0.4 million acres. Total soybean supply is forecast almost unchanged as reduced crop production is nearly offset by increased beginning stocks. Soybean ending stocks are projected at 215 million bushels, unchanged from last month.

Soybean oil ending stocks are raised for both 2006/07 and 2007/08 reflecting weaker-than-expected domestic disappearance for food use in 2006/07.

The U.S. season-average soybean price range for 2007/08 is projected at \$7.85 to \$8.85, up 50 cents on both ends of the range as prices during harvest have been unseasonably strong. Product prices are also raised this month. The soybean meal price is projected at \$220 to \$250 per short ton, up \$15 on both ends of the range. The soybean oil price range is projected at 34.5 to 38.5 cents per pound, up 1.5 cents on both ends of the range.

Global oilseed production for 2007/08 is projected at 392 million tons, up 1.1 million tons from last month. Foreign oilseed production accounts for most of the change. Soybean production for Brazil is raised 1 million tons to 62 million based on increased harvested area as producers respond to higher soybean prices. Soybean cash prices reported in Brazil are 40 percent above year-earlier levels after adjusting for stronger currency values. China soybean production is reduced 0.6 million tons to 14.6 million due to dry conditions in the principal growing region. This would be the smallest soybean crop in 8 years. Soybean production is also raised for India. Australia rapeseed production is reduced sharply this month due to the impact of drought, which was especially severe during the critical month of September. Rapeseed production was also reduced for Canada. Global cottonseed production is raised mainly due to higher output in China.

Global oilseed stocks for 2007/08 are raised slightly this month as increased soybean stocks for Brazil, resulting from increased production, are mostly offset by lower stocks in Argentina.

SUGAR: Projected 2007/08 U.S. sugar supply is increased 97,000 short tons, raw value, from last month as higher production and imports more than offset lower beginning stocks. Production is increased 105,000 tons based on processors' projections compiled by the Farm Service Agency. Beet sugar production is increased 107,000 tons. Tariff rate quota imports are increased 14,000 tons to account for Costa Rica's quota under the Dominican Republic-Central American Free Trade Agreement. Use is unchanged.

For 2006/07, ending stocks are decreased 22,000 tons from last month to account for minor changes in production estimates and imports.

LIVESTOCK, POULTRY, AND DAIRY: The forecast for total 2007 U.S. meat production is raised slightly as higher forecast pork and turkey production more than offset reduced beef and broiler output. Pork production is raised as the *Quarterly Hogs and Pigs* report, released September 28, indicated increased supplies of market hogs. Turkey production is increased as bird numbers continue to build. Beef production is reduced due to a slower-than-expected pace of fed cattle marketings. Broiler production data through August indicates lower output in the third quarter. For 2008, the total meat production forecast is raised due mainly to increased pork output. The *Quarterly Hogs and Pigs* report indicated that producers intend to increase sows farrowing into 2008, and coupled with continued growth in pigs per litter, hog supplies will be larger and support increased slaughter in 2008. Turkey production is also increased. Beef production is reduced fractionally, and broiler meat production is unchanged.

Forecast 2007 meat exports are raised due to expected relatively strong shipments of beef, pork, and broiler meat during the third quarter. Forecast exports for 2008 are increased from last month, primarily reflecting expectations of stronger beef and broiler exports.

Forecasts for 2007 and 2008 cattle prices are increased as cattle supplies are expected to be tight through next year. Forecast hog prices are reduced for both 2007 and 2008 as supplies of pork are forecast higher than last month. Broiler prices are forecast lower as supplies of meats are expected to be larger. Egg prices are increased slightly for 2007 reflecting current demand strength.

Milk production forecasts for 2007 and 2008 are raised. Producers continue to respond to high milk prices with high replacement heifer and calf prices pointing to continued expansion plans. Milk per cow growth into 2008 is expected to be moderated by tight supplies of alfalfa hay and relatively high feed prices. Stocks, both on a fat and skim-solids basis, are forecast higher than last month reflecting increased supplies of butter and stocks of nonfat dry milk (NDM). Although NDM stocks are expected to dissipate somewhat as product moves into export channels, increased production of dairy products in 2008 likely will result in somewhat higher fat and skim-solids basis stocks than forecast last month.

Higher milk production is expected to pressure prices despite relatively robust demand. Cheese, butter, and whey prices are reduced as supplies are expected to build. NDM prices should remain relatively strong despite increased production as world supplies are expected to remain tight through much of 2008. Dry whey prices are lowered as prices have dropped significantly. As a result of generally reduced product price forecasts, Class price forecasts are reduced. The Class III price forecasts are lowered for 2007 and 2008 due to lower cheese and whey prices. The Class IV price forecast for both years is lowered as a lower butter price forecast more than offsets slightly higher forecast NDM prices. For 2007 and 2008 the all milk price forecasts are also reduced, with prices in 2007 forecast to average a record \$18.95 to \$19.05 per cwt, and decline to \$17.70 to \$18.60 per cwt in 2008.

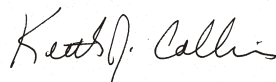

COTTON: The U.S. cotton estimates for 2007/08 include lower beginning stocks, which are more than offset by higher production, resulting in 200,000-bale increase in ending stocks. Beginning stocks are reduced 2.3 percent based on the final 2006/07 ending stock estimate issued by the U.S. Census Bureau. Production is raised 2 percent to 18.2 million bales, due mainly to higher estimated production in Texas. Domestic mill use and exports are unchanged from last month.

Significant increases in 2007/08 world production, consumption, and stocks mainly reflect revisions to the China balance sheet beginning in 2004/05 (see <http://www.fas.usda.gov/psdonline/circulars/cotton.pdf> after 9:00 a.m. on October 12 for a detailed explanation). The revisions are based on a recent statement by China's National Development and Reform Commission (NDRC) that the 2006-crop production was about 35.5 million bales, which is 9 percent above USDA's September estimate. Corresponding increases are made in China's production for 2004/05, 2005/06, and 2007/08; at the same time, the residual calculations (negative loss) for China in 2005/06, 2006/07, and 2007/08 are lower in absolute terms. The accumulation of the prior-year revisions, partially offset by a modest reduction in beginning stocks for India, accounts for a 3.5-million-bale increase in 2007/08 world beginning stocks.

World production in 2007/08 is raised nearly 3 percent, including increases for China, the United States, and Brazil, partially offset by reductions for Iran, Australia, Uzbekistan, and others. World consumption is 1.3 percent higher, as China's consumption for 2007/08 is raised 1.5 million bales to 55.0 million based on the NDRC's estimates and other evidence of continued strong consumption growth. World ending stocks are raised nearly 7 percent from last month or 3.5 million bales, but are still down 9 percent from beginning stocks.

Approved by the Acting Secretary of Agriculture and the World Agricultural Outlook Board, Gerald A. Bange, Chairperson, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees.

1/ Fiscal years beginning Oct 1. Includes Puerto Rico. Historical data are from FSA, "Sweetener Market Data" except imports (U.S. Customs Service, Census Bureau). 2/ Production projections for 2007/08 are processor projections compiled by the Farm Service Agency. 3/ Actual arrivals under the tariff rate quota (TRQ) with late entries, early entries, and TRQ overfills assigned to the fiscal year in which they actually arrived. For 2007/08, includes shortfall of 70,000 tons. 4/ Includes sugar under the re-export and polyhydric alcohol programs. 5/ Does not include Mexico TRQ imports. For 2005/06, other high-tier (30) and other (56). For 2006/07, other high-tier (0) and other (0). For 2007/08, other high-tier (0) and other (5). 6/ Transfers to sugar-containing products for reexport, and for nonedible alcohol and feed. 7/ Includes SMD miscellaneous uses and the difference between SMD imports and WASDE imports.

U. S. Cotton Supply and Use 1/

Item	2005/06	2006/07 Est.	2007/08 Projections	
			September	October
Million acres				
Area				
Planted	14.25	15.27	10.85	10.85
Harvested	13.80	12.73	10.54	10.54
Pounds				
Yield per harvested acre	831	814	811	826
Million 480 pound bales				
Beginning stocks 2/	5.50	6.05	9.70	9.48
Production	23.89	21.59	17.81	18.15
Imports	0.03	0.02	0.02	0.02
Supply, total	29.41	27.66	27.53	27.65
Domestic use	5.87	4.95	4.60	4.60
Exports	18.04	13.00	16.70	16.70
Use, total	23.91	17.95	21.30	21.30
Unaccounted 3/	-0.55	0.23	0.03	-0.05
Ending stocks	6.05	9.48	6.20	6.40
Avg. farm price 4/	47.7	47.3		44.9 5/

Note: Reliability calculations at end of report.

1/ Upland and extra-long staple; marketing year beginning August 1. Totals may not add due to rounding. 2/ Based on Bureau of Census data. 3/ Reflects the difference between the previous season's supply less total use and ending stocks based on Bureau of Census data. 4/ Cents per pound for upland cotton. 5/ Average price for August 2007. USDA is prohibited by law from publishing cotton price projections.

Notes:

Public Law 106-78, signed October 22, 1999, requires the Secretary of Agriculture to estimate and report the U.S. upland cotton season-ending stocks-to-use ratio, excluding projected raw cotton imports but including the quantity of raw cotton imports that has been imported during the marketing year. Pursuant to this requirement, the estimated ratio for 2007/08 is 30.9 percent.

A table including detail for upland and extra long staple (ELS) cotton will be posted by noon on WASDE report release days at:
<http://www.usda.gov/oce/commodity/wasde/index.htm>

1/ Data based on local marketing years except Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil and Paraguay. 4/ Japan, China, and EU, Mexico, and Southeast Asia (includes Indonesia, Malaysia, Philippines, and Thailand).

1/ Data based on local marketing years except for Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil, and India. 4/ Eastern Europe, China, EU, and Southeast Asia (includes Indonesia, Malaysia, Philippines, and Thailand).

1/ Includes products exported under the Dairy Export Incentive Program.

2/ Includes commercial exports.

Note: Tables on pages 35-37 present a 26-year record of the differences between the October projection and the final estimate. Using world wheat production as an example, changes between the October projection and the final estimate have averaged 7.6 million tons (1.4%) ranging from -26.7 to 9.5 million tons. The October projection has been below the estimate 17 times and above 9 times.

1/ See pages 35 and 36 for record of reliability for U.S. wheat, rice, soybeans, and cotton. 2/ Final estimate for 1981/82-2005/06 is defined as the first November estimate following the marketing year and for 2006/07 last month's estimate. 3/ May not total 26 for crops and 24 for animal production if projection was the same as the final estimate. 4/ Calendar years 1983 thru 2006 for meats, eggs, and milk. Final for animal products is defined as latest annual production estimate published by NASS.

Related USDA Reports

The *WASDE* report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the *WASDE* report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. For more information on how the *WASDE* report is prepared, go to: <http://www.usda.gov/oce/commodity/wasde>.

Supply and Demand Database

The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <http://www.fas.usda.gov/psd/online>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.

Foreign Production Assessments

Preliminary foreign production assessments and satellite imagery analysis used to prepare the *WASDE* report are provided by the Production Estimates and Crop Assessment Division (PECAD) of FAS. PECAD is located at www.pecad.fas.usda.gov/.

Metric Conversion Factors

1 Hectare = 2.4710 Acres

1 Kilogram = 2.20462 Pounds

Metric-Ton Equivalent	= Domestic Unit	Factor
Wheat & Soybeans	bushels	.027216
Rice	cwt	.045359
Corn, Sorghum, & Rye	bushels	.025401
Barley	bushels	.021772
Oats	bushels	.014515
Sugar	short tons	.907185
Cotton	480-lb bales	.217720

Energizing Rural America in the Global Marketplace

Please join us for USDA's 84th annual Forum as the Secretary of Agriculture and government, farm, and industry leaders discuss the future of American agriculture.

- **More than 100 experts are scheduled to speak.**
- **Topical sessions include luncheon and dinner speakers.**
- **Networking opportunities — 1,700 people are expected to attend.**

Forecasts • Trends • Policies
