**WHEAT:** The U.S. wheat supply and use projections are mostly unchanged this month with imports raised 5 million bushels reflecting the strong pace of hard red spring wheat shipments from Canada. With other categories of use unchanged, ending stocks for 2007/08 are projected 5 million bushels higher at 312 million. The projected season-average farm price is narrowed 10 cents on each end of the range to \$5.90 to \$6.30 per bushel.

Global wheat production for 2007/08 is projected up 2.8 million tons this month reflecting higher output in Argentina, China, and Ethiopia, which more than offsets reductions in Australia and Brazil. Production for Argentina is raised 1.0 million tons on higher harvested area and improved yield prospects with a continuation of excellent growing season weather since mid-September. China production is increased 1.0 million tons reflecting recent government reports. Production for Ethiopia is raised 1.0 million tons on higher yields with good growing season weather. Australia production is cut 0.5 million tons as crop prospects continue to decline with drought persisting in key southeastern growing areas. Recent rains during harvest may also have adversely affected grain quality and yields. Brazil output is lowered 0.2 million tons based on an expected reduction in harvested area.

World imports for 2007/08 are lowered 0.4 million tons. Imports for India are lowered 1.0 million tons with smaller reductions for South Korea, Bangladesh, and Sri Lanka. Partly offsetting are increases for Morocco, Azerbaijan, Brazil, Uzbekistan, and the United States. Exports are nearly unchanged with Australia and EU-27 exports both reduced 0.5 million tons and Argentina raised 1.0 million tons.

World wheat consumption for 2007/08 is projected 1.3 million tons higher as increased production supports higher food use in some developing countries even as high prices and lower supplies elsewhere reduce world wheat feeding. Higher production in Ethiopia, Sudan, and Nigeria, is expected to increase food use in Sub-Saharan Africa. Wheat feeding, however, is lowered for Australia, Canada, EU-27, and South Korea. With higher world beginning stocks and increased production, world ending stocks are projected 2.8 million tons higher than last month. At 109.8 million tons, 2007/08 world ending stocks remain the lowest in 30 years.

**COARSE GRAINS:** Projected U.S. ending stocks of corn for 2007/08 are lowered 100 million bushels this month as lower production more than offsets reduced feed and residual use. Production is forecast at 13.2 billion bushels, down 150 million on lower yields. Corn feed and residual use is lowered 50 million bushels reflecting the smaller crop and higher expected prices. The season-average farm price is projected at \$3.20 to \$3.80 per bushel, up 30 cents on both ends of the range on strong cash prices that have continued to rise despite this year's record corn crop.

Sorghum production is raised 13 million bushels, but higher projected exports more than offset the increase in supplies leaving ending stocks down 2 million bushels. Exports are raised 15 million bushels reflecting the pace of export shipments and sales and strong EU-27 demand for U.S. sorghum. Barley exports are raised 25 million bushels based on current commitments and strong global demand for barley. Barley imports are projected 5 million bushels higher. Feed and residual use for barley is lowered 10 million bushels and food, seed, and industrial use is lowered 5 million bushels. The sorghum season-average price is projected 30 cents higher on each end of the range to \$3.00 to 3.60 per bushel. The barley price projection is raised 35 cents on each end of the range to \$3.55 to \$4.15 per bushel. The oats price is projected at \$2.10 to \$2.70 per bushel, up 10 cents on each end of the range.

World coarse grain supplies are projected 0.8 million tons higher this month as a small reduction in global corn output is more than offset by higher production for the other coarse grains. Lower corn production in the United States and Nigeria is partly offset by increases for China, Ethiopia, EU-27, India, and Ukraine. China corn production is raised 2.0 million tons this month reflecting higher harvested area as recent provincial reports indicate higher-than-expected planted area. Corn production in EU-27 is raised 0.5 million tons mostly on increases for Italy and France. Corn production for Ukraine is raised 0.5 million tons on higher expected yields reflected in early harvest results. Sorghum production is raised for Mexico, Ethiopia, and Australia. Barley production for Australia is lowered 0.7 million tons, but increases of 0.5 million tons for EU-27 and 0.3 million tons for Ethiopia are more than offsetting.

Global coarse grain imports and exports are both projected higher this month. Imports are raised 0.7 million tons with the biggest increases for EU-27, Canada, and Japan. Corn imports for Canada are raised 0.3 million tons as wheat feeding is reduced a like amount. EU-27 imports of sorghum are increased 0.4 million tons as wheat feeding is also projected lower there. Corn imports are raised 0.2 million for Japan supporting increases in feeding and other domestic uses. Partly offsetting is a reduction in corn imports for South Korea. Global coarse grain exports are raised 2.2 million tons with the biggest increase for the United States as sorghum and barley exports are raised. Also raised are Argentina sorghum exports, EU-27 barley exports, India corn exports, and South Africa corn exports. A 0.3-million-ton reduction in barley exports by Australia is partly offsetting. World coarse grain ending stocks are nearly unchanged.

**RICE:** U.S. rice production in 2007/08 is forecast at 197.9 million cwt, 0.9 million above last month due to a higher yield. Average yield is estimated at a record 7,247 pounds per acre, up 32 pounds from last month. Harvested area is unchanged at 2.73 million acres. Both long-grain and combined medium- and short-grain production are up from last month. The all-rice import forecast is raised 1 million cwt to a record 21.5 million — with the increase in medium- and short-grain rice. All rice exports are projected at 107 million cwt, up 1 million from a month earlier. Long-grain exports are increased to 84 million cwt, while combined medium- and short-grain exports are unchanged at 23 million. Ending stocks are projected at 27.1 million cwt, up 0.9 million from last month. The season-average farm price is forecast at \$10.75 to \$11.25 per cwt, up 45 cents per cwt on the low end of the range and up 55 cents per cwt on the high end. The midpoint of the range is the highest since 1980/81.

Global 2007/08 rice production and ending stocks are raised from a month ago, while trade and ending stocks are lowered. World production is forecast at a record 421.2 million tons, up 2.5 million from last month due mainly to an increase for China (up 2.5 million tons). Other production changes include increases for the United States, Vietnam, and several African countries that were nearly offset by a decrease for Bangladesh. Global imports are lowered slightly due to reductions for Brazil, Iraq, Afghanistan, and China, which are nearly offset by increases for the U.S. and Bangladesh. Global exports are lowered from a month ago due mostly to a reduction for India, which is partially offset by increases for the United States and Vietnam. Ending stocks are raised 3.2 million tons to 74.1 million tons due mainly to increases for India and China. World ending stocks are the lowest since 1983/84, and at 17.5 percent, the stocks-to-use ratio is the lowest since 1981/82.

**OILSEEDS:** U.S. oilseed ending stocks for 2007/08 are projected at 6.8 million tons, down 0.1 million from last month. Total U.S. oilseed production is projected at 80.1 million tons, up 0.1 million tons due to higher cottonseed and peanut output. Soybean production is forecast at 2.594 billion bushels, down 4 million bushels based on a lower soybean yield of 41.3 bushels per acre. Soybean ending stocks are down 5 million to 210 million bushels.

Soybean and product price forecasts are all raised this month. The U.S. season-average soybean price for 2007/08 is projected at \$8.50 to \$9.50 per bushel, up 65 cents on both ends of the range, reflecting sharply higher cash and futures prices. Soybean meal prices are projected at \$235 to \$265 per short ton, up \$15 on both ends of the range. Soybean oil prices are projected at 37.5 to 41.5 cents per pound, up 3 cents on both ends of the range. Soybean oil prices at Decatur, Illinois, have recently exceeded 41.5 cents per pound and have increased almost 15 percent in the past month.

Global oilseed production for 2007/08 is projected at 390.4 million tons, down 1.6 million tons from last month. Foreign production accounts for most of the change as reduced rapeseed and cottonseed production are only partly offset by increased sunflowerseed. Foreign rapeseed production is reduced 1.1 million tons mainly due to lower production prospects for India. Sharply lower rapeseed area is expected due to India's minimum-support price changes favoring wheat over rapeseed. Rapeseed production is also projected 200,000 tons lower for Australia. Global cottonseed production is reduced mainly due to lower output for Pakistan where insect damage has reduced prospects for the cotton crop. Sunflowerseed production is raised for Argentina due to increased area as producers respond to sharply higher prices for sunflowerseed relative to other crops. Other changes include higher rapeseed and sunflowerseed production for EU-27, lower sunflowerseed production for Russia, increased soybean production for Paraguay, and reduced soybean production for China. Global palm oil production for both 2006/07 and 2007/08 is projected higher due to increased output for Indonesia.

Global oilseed ending stocks for 2007/08 are reduced 1.8 million tons to 56.3 million tons mainly reflecting lower soybean stocks in Brazil and China. Brazil stocks are reduced due to a projected increase in soybean crush for both 2006/07 and 2007/08. Global oilseed stocks for 2007/08 are projected down 21 percent from 2006/07. Global vegetable oil ending stocks are projected higher this month mainly due to increased palm oil stocks in Indonesia.

**SUGAR:** Projected 2007/08 U.S. sugar supply is increased 111,000 short tons, raw value, from last month, mainly due to higher beginning stocks and imports. Production is increased 4,000 tons, based on processors' projections compiled by the Farm Service Agency (FSA). Imports are increased 70,000 tons as improved production prospects in Mexico lead to higher exports to the U.S. market, partially offset by lower tariff rate quota (TRQ) imports. The TRQ shortfall is increased 30,000 tons.

Projected 2007/08 use is increased 130,000 tons, mainly due to an increase of 100,000 tons in domestic deliveries based on trend analysis including the final 2006/07 estimate. Deliveries for re-export products are increased 25,000 tons and for feed 5,000 tons.

For 2006/07, ending stocks are increased 37,000 tons based on final FSA data, which reflect a number of nearly offsetting changes. Given the final stocks estimate, the residual statistical discrepancy between supply and use amounts to negative 121,000 tons of use.

**LIVESTOCK, POULTRY, AND DAIRY:** The forecast for total 2007 U.S. meat production is raised reflecting stronger fourth-quarter production estimates for red meat and poultry. Cattle slaughter forecasts are increased as packers bid aggressively for fed cattle and cow slaughter remains large. Hog slaughter is expected to remain strong through the fourth quarter. The broiler production forecast is raised as September production was larger than expected and hatchery data point to continued expansion. Turkey production forecasts are also raised. For 2008, total meat production is increased as higher broiler and turkey production forecasts more than offset lower beef production. Pork production is reduced slightly as higher feed prices are expected to limit weight gains. Egg production forecasts are reduced as the hatching egg flock is expanding slower than expected despite record egg prices.

The 2007 and 2008 meat export forecasts are reduced. U.S. beef export forecasts are reduced reflecting the suspension of exports to South Korea pending successful negotiation of new import protocols. Pork exports are raised as lower prices and a weaker dollar are expected to support increased sales.

Forecasts for 2007 and 2008 cattle prices are reduced. Current cattle prices are weakening and larger supplies of meat are expected to pressure cattle prices. Hog prices are lower for 2007 and early 2008 reflecting large slaughter and higher total meat supplies. The broiler price forecast is reduced for 2007 but unchanged for 2008 as continued demand strength is expected to support near-record prices despite somewhat larger supplies. Egg prices are increased slightly for 2007 reflecting current demand strength but are unchanged for 2008.

Forecast milk production for 2007 and 2008 is reduced. Cow herds and milk per cow are expanding gradually although USDA's *Milk Production* report released in October indicated that the pace is slightly below earlier expectations. Imports are reduced for both 2007 and 2008. A weak U.S. dollar and tight milk supplies in major exporting countries are expected to result in lower imports on both a fat and skim-solids basis. Ending stocks for 2007 on a fat basis are forecast higher than last month reflecting continued large supplies of butter. Skim-solids stocks are unchanged from last month as nonfat dry milk (NDM) stocks are expected to diminish as product moves into export channels.

Dairy product prices are changed slightly in 2007 and 2008. Cheese price forecasts are raised in both years reflecting good demand and modest growth in supplies. Butter prices are reduced for 2007 and early 2008 as supplies have been building. NDM prices are reduced for 2007 on rising inventories. Dry whey prices are little changed. As a result of stronger cheese price forecasts, the Class III price forecast is raised for 2007 and 2008. The Class IV price forecast is lowered for 2007, but unchanged in 2008. The all milk price is forecast at \$18.95 to \$19.05 per cwt for 2007 and \$17.70 to \$18.60 per cwt for 2008, unchanged from last month.

**COTTON:** The 2007/08 U.S. cotton forecasts include higher production, lower exports, and higher ending stocks relative to last month. Production is raised 708,000 bales to 18.9 million, due mainly to an increase in Texas. Domestic mill use is unchanged. Exports are reduced 500,000 bales to 16.2 million due to recent sluggish sales and shipments and lower imports by China. Ending stocks of 7.6 million bales are 19 percent above last month. The revised stocks-to-use ratio is 36.5 percent.

Revisions were made in U.S. 2005/06 and 2006/07 exports this month to adjust for likely duplication in accounting for 2005/06 end-of-season shipments. U.S. exports for both years now reflect the levels included in USDA's *U.S. Export Sales* report. These adjustments do not affect ending stocks.

This month's world cotton supply and demand forecasts show lower production and consumption, higher trade, and marginally lower ending stocks compared with last month. Production is reduced nearly 1.0 million bales as lower production in Pakistan, Sudan, and Turkey is partially offset by higher production in the United States and Uzbekistan. Consumption is reduced in India as the strengthening currency is slowing textile exports. At the same time, recent Pakistan government data indicate that Pakistan's consumption growth in 2006/07 and 2007/08 is stronger than previously estimated. World trade is raised slightly as significantly higher imports by Pakistan are partly offset by lower imports by China.

Approved by the Acting Secretary of Agriculture and the World Agricultural Outlook Board, Gerald A. Bange, Chairperson, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees.

Ending stocks	1,698	1,787	1,899	1,880
Stocks to use ratio	16.2	17.1	18.2	17.8

1/ Fiscal years beginning Oct 1. Includes Puerto Rico. Historical data are from FSA, "Sweetener Market Data" except imports (U.S. Customs Service, Census Bureau). 2/ Production projections for 2007/08 are processor projections compiled by the Farm Service Agency. 3/ Actual arrivals under the tariff rate quota (TRQ) with late entries, early entries, and TRQ overfills assigned to the fiscal year in which they actually arrived. For 2007/08, includes shortfall of 100,000 tons. 4/ Includes sugar under the re-export and polyhydric alcohol programs. 5/ Does not include Mexico TRQ imports. For 2005/06, other high-tier (30) and other (56). For 2006/07, other high-tier (0) and other (6). For 2007/08, other high-tier (0) and other (5). 6/ Transfers to sugar-containing products for reexport, and for nonedible alcohol and feed. 7/ Includes SMD miscellaneous uses and the difference between SMD imports and WASDE imports.

U. S. Cotton Supply and Use 1/

Item	2005/06	2006/07 Est.	2007/08 Projections	
			October	November
Million acres				
Area				
Planted	14.25	15.27	10.85	10.85
Harvested	13.80	12.73	10.54	10.54
Pounds				
Yield per harvested acre	831	814	826	859
Million 480 pound bales				
Beginning stocks 2/	5.50	6.05	9.48	9.48
Production	23.89	21.59	18.15	18.86
Imports	0.03	0.02	0.02	0.02
Supply, total	29.41	27.66	27.65	28.36
Domestic use	5.87	4.95	4.60	4.60
Exports	17.55	13.01	16.70	16.20
Use, total	23.42	17.96	21.30	20.80
Unaccounted 3/	-0.06	0.22	-0.05	-0.04
Ending stocks	6.05	9.48	6.40	7.60
Million 480 pound bales				
Avg. farm price 4/	47.7	46.5		46.1 5/

Note: Reliability calculations at end of report.

1/ Upland and extra-long staple; marketing year beginning August 1. Totals may not add due to rounding. 2/ Based on Bureau of Census data. 3/ Reflects the difference between the previous season's supply less total use and ending stocks based on Bureau of Census data. 4/ Cents per pound for upland cotton. 5/ Average price for August-September 2007. USDA is prohibited by law from publishing cotton price projections.

Notes:

Public Law 106-78, signed October 22, 1999, requires the Secretary of Agriculture to estimate and report the U.S. upland cotton season-ending stocks-to-use ratio, excluding projected raw cotton imports but including the quantity of raw cotton imports that has been imported during the marketing year. Pursuant to this requirement, the estimated ratio for 2007/08 is 37.6 percent.

A table including detail for upland and extra long staple (ELS) cotton will be posted by noon on WASDE report release days at:  
<http://www.usda.gov/oce/commodity/wasde/index.htm>

1/ Data based on local marketing years except for Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil, and India. 4/ Eastern Europe, China, EU, and Southeast Asia (includes Indonesia, Malaysia, Philippines, and Thailand).

1/ Simple average of monthly prices calculated by AMS from NASS weekly average dairy product prices for class price computations. Details may be found at [http://www.ams.usda.gov/dyfmoms/mib/fedordprc\\_dscrp.htm](http://www.ams.usda.gov/dyfmoms/mib/fedordprc_dscrp.htm). 2/ Annual Class III and Class IV prices are the simple averages of monthly minimum Federal order milk prices paid by regulated plants for milk used in the respective classes. All milk price is the simple average of monthly prices received by farmers for milk at average test. 3/ Does not reflect any deductions from producers as authorized by legislation.

Note: Tables on pages 35-37 present a 26-year record of the differences between the November projection and the final estimate. Using world wheat production as an example, changes between the November projection and the final estimate have averaged 5.2 million tons (1.0%) ranging from -18.1 to 7.2 million tons. The November projection has been below the estimate 18 times and above 8 times.

1/ See pages 35 and 36 for record of reliability for U.S. wheat, rice, soybeans, and cotton. 2/ Final estimate for 1981/82-2005/06 is defined as the first November estimate following the marketing year and for 2006/07 last month's estimate. 3/ May not total 26 for crops and 24 for animal production if projection was the same as the final estimate. 4/ Calendar years 1983 thru 2006 for meats, eggs, and milk. Final for animal products is defined as latest annual production estimate published by NASS.

## Related USDA Reports

---

The *WASDE* report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the *WASDE* report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. For more information on how the *WASDE* report is prepared, go to: <http://www.usda.gov/oce/commodity/wasde>.

---

## Supply and Demand Database

---

The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <http://www.fas.usda.gov/psd/online>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.

---

## Foreign Production Assessments

---

Preliminary foreign production assessments and satellite imagery analysis used to prepare the *WASDE* report are provided by the Production Estimates and Crop Assessment Division (PECAD) of FAS. PECAD is located at [www.pecad.fas.usda.gov/](http://www.pecad.fas.usda.gov/).

---

## Metric Conversion Factors

---

1 Hectare = 2.4710 Acres

1 Kilogram = 2.20462 Pounds

Metric-Ton Equivalent	= Domestic Unit	Factor
Wheat & Soybeans	bushels	.027216
Rice	cwt	.045359
Corn, Sorghum, & Rye	bushels	.025401
Barley	bushels	.021772
Oats	bushels	.014515
Sugar	short tons	.907185
Cotton	480-lb bales	.217720

## **Energizing Rural America in the Global Marketplace**

**Please join us for USDA's 84<sup>th</sup> annual Forum as the Secretary of Agriculture and government, farm, and industry leaders discuss the future of American agriculture.**

- **More than 100 experts are scheduled to speak.**
- **Topical sessions include luncheon and dinner speakers.**
- **Networking opportunities.**

**Forecasts • Trends • Policies**

**Register at: [www.usda.gov/oce/forum](http://www.usda.gov/oce/forum) for \$300**

## World Agricultural Supply and Demand Estimates

WASDE-452 - November 9, 2007

**Electronic Access:** Download the *WASDE* report <http://usda.mannlib.cornell.edu/>.  
Get a free e-mail subscription to the *WASDE* and other USDA crop reports at  
<http://usda.mannlib.cornell.edu>. Select the "Reports by E-Mail" bar to sign up.

**Subscriptions:** For print subscriptions, call the National Technical Information  
Service (NTIS) at 1-800-999-6779 or 703-605-6220.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
