WASDE - 513

Approved by the World Agricultural Outlook Board

December 11, 2012

WHEAT: Projected U.S. wheat ending stocks for 2012/13 are raised 50 million bushels reflecting lower prospects for exports again this month. Projected exports are lowered 50 million bushels reflecting the slow pace of sales and shipments to date and higher expected competition from foreign supplies. U.S. exports are projected 45 million bushels lower for Hard Red Winter wheat, 10 million bushels lower for Soft Red Winter wheat, and 5 million bushels lower for Hard Red Spring wheat. White wheat exports are raised 10 million bushels. The projected 2012/13 season-average farm price for all wheat is lowered 10 cents at the midpoint and the range is narrowed to \$7.70 to \$8.30 per bushel.

Global wheat supplies for 2012/13 are projected 1.6 million tons higher as a 3.7-million-ton increase in world production more than offsets lower beginning stocks mostly reflecting higher 2011/12 wheat feeding for China. China wheat production for 2012/13 is raised 2.6 million tons based on the latest official estimates from the National Bureau of Statistics. Production for Australia and Canada are raised 1.0 million tons and 0.5 million tons, respectively, also based on the latest official government estimates. Partly offsetting these increases are small reductions for Brazil and EU-27.

Global wheat exports for 2012/13 are raised slightly this month. Exports are raised 0.5 million tons each for Australia, EU-27, and India, more than offsetting the U.S. reduction. Exports are lowered for Paraguay and Turkey. Imports are raised for Brazil, China, Iran, and Russia, but lowered for Turkey. Global wheat feeding for 2012/13 is raised slightly with reductions for EU-27 and Australia more than offset by increases for China, Canada, and Iran. For EU-27, higher corn imports and feeding offset the reduction in expected wheat feed use. World wheat ending stocks for 2012/13 are projected 2.8 million tons higher on increases for the United States, Australia, Russia, and EU-27.

COARSE GRAINS: U.S. feed grain supply and use projections for 2012/13 are unchanged this month, but price outlooks for corn and sorghum are lowered based on prices reported to date. The season-average farm price for corn is lowered 20 cents at the midpoint and the projected range is narrowed to \$6.80 to \$8.00 per bushel. Prices received by farmers through October remained well below cash market bids and this year's early corn harvest appears to have boosted early season marketings placing further downward pressure on the outlook for the season-average price. The season-average sorghum price is lowered 10 cents at the midpoint and the projected range is narrowed to \$6.50 to \$7.70 per bushel. The projected barley and oats season-average price ranges are narrowed 5 cents on each end to \$6.10 to \$6.80 per bushel and \$3.55 to \$4.05 per bushel, respectively.

Global coarse grain supplies for 2012/13 are projected 7.0 million tons higher mostly reflecting a larger reported corn crop for China. Beginning coarse grain stocks for 2012/13 are lowered

1.0 million tons in part reflecting higher 2011/12 corn exports for Argentina. Global 2012/13 corn production is raised 9.4 million tons with China corn output up 8.0 million tons based on recent estimates from the National Bureau of Statistics. Strong price incentives to expand corn plantings and favorable summer rainfall, particularly in the northeast provinces, support increases in area and yields raising them to new records. Corn production for Canada is raised 1.5 million tons this month to a new record on higher yields and a record area as reported by Statistics Canada. Russia corn production is raised 1.0 million tons, also a new record. Corn production is increased for North Korea and Chile, up 0.4 million tons, and 0.3 million tons, respectively. Offsetting these increases are reductions for Argentina, Moldova, and Ukraine corn, down 0.5 million tons each, with lower expected area for Argentina, lower area and yields for Moldova, and lower yields for Ukraine. Belarus corn production is also lowered 0.2 million tons.

Other notable 2012/13 coarse grain production changes this month include a 0.6-million-ton reduction for Canada barley, a 0.3-million-ton reduction for Australia sorghum, and 0.3-million-ton and 0.2-million-ton reductions, respectively, for Canada and Australia oats. All are based on the latest official estimates from Statistics Canada and the Australian Bureau of Agricultural and Resource Economics and Sciences.

Global 2012/13 coarse grain trade is increased mostly on higher expected corn imports and exports. Corn imports are raised 1.5 million tons for EU-27. Corn exports are raised 0.5 million tons each for Canada and Russia. Increases in local marketing year 2011/12 exports for Argentina, Paraguay, and South Africa support higher 2012/13 consumption this month for Northern Hemisphere countries. Global corn consumption for 2012/13 is raised 8.7 million tons mostly with increases of 6.0 million tons and 1.5 million tons, respectively, for China and EU-27 corn feeding. Corn feed and residual use is also raised for Canada and Russia, but lowered for Argentina, Ukraine, and Moldova. Corn food, seed, and industrial use is raised 2.0 million tons for China, also boosting global corn consumption. World corn ending stocks for 2012/13 are projected 0.4 million tons lower, mostly on reductions in Argentina, Colombia, and Ukraine. Small increases in a number of countries, including Canada, are partly offsetting.

RICE: No changes are made on the supply side of the U.S. 2012/13 all rice and rice-by-type supply and use balance sheets. Although total use for all rice is unchanged at 230.0 million cwt, the export forecast is raised 2.0 million to 105.0 million, and domestic and residual use is lowered the same amount to 125.0 million. The increase in the export forecast is all in long-grain rice destined for markets in Latin America. The rough rice and the combined brown- and milled-rice export forecasts are each raised 1.0 million cwt from last month. The long-grain export forecast at 74.0 million cwt is up nearly 11 percent from the prior year. All rice ending stocks at 30.1 million cwt are unchanged from a month ago. The rice-by-type ending stocks projections at 15.1 million cwt for long-grain rice and 12.9 million for combined medium- and short-grain rice are also the same as a month ago.

The 2012/13 all rice and rice-by-type season-average farm price forecasts are unchanged from last month. The long-grain, combined medium- and short-grain, and all rice season-average farm price forecasts (midpoints) are \$14.20 per cwt, \$17.00, and \$15.00, respectively.

World 2012/13 rice supplies are up more than the increase in total use resulting in a slight increase in global ending stocks. Global rice production is projected at a record 465.3 million

tons, up 1.0 million from last month due primarily to higher forecasts for Japan, North Korea, and Vietnam. Vietnam's 2012/13 rice crop is raised 610,000 tons to a record 27.7 million tons based on a U.S. Agricultural Attaché report from Vietnam. According to the report, the Mekong River Delta expects to reach a rice planted area of up to 1.68 million hectares, over 100,000 hectares more than average for the Spring crop due to the favorable moderate flooding level that also allowed growers to start planting the crop earlier. North Korea's crop is raised 16 percent to 1.74 million tons based on a report from the World Food Program. The North Korean rice crop benefited from an increase in fertilizer availability and favorable growing season and harvest weather. Japan's crop is raised 3 percent to 7.8 million tons, as both area harvested and average yield are raised, based on the latest official government estimate from Japan. Global consumption for 2012/13 is forecast at a record 468.5 million tons due mostly to increases for Japan, North Korea, and a number of countries in Sub-Saharan Africa. Global 2012/13 trade is changed little from a month ago. World ending stocks for 2012/13 are projected at 102.5 million tons, up 0.3 million from last month, but down 3.2 million from the year earlier. Ending stocks are raised for Vietnam and Japan but lowered for Iraq, Iran, and South Korea.

OILSEEDS: Total U.S. oilseed production for 2012/13 is projected at 91.3 million tons, down slightly due to a small reduction in cottonseed. Soybean crush is raised 10 million bushels to 1.570 billion due to strong foreign demand for soybean products. Soybean oil production is raised 460 million pounds on the increased crush and on a higher soybean oil extraction rate. Soybean oil exports are projected at 1.8 billion pounds, up sharply from 1.2 billion last month on exceptionally strong November sales of just over 700 million pounds to several markets including China, Mexico, and undeclared destinations. Soybean meal exports are raised 0.3 million short tons to 8.2 million on strong sales to EU-27, Egypt, and several Asian markets including the Philippines and South Korea. Soybean meal domestic use is reduced 0.1 million short tons to 29.4 million in line with current meat production forecasts. With soybean exports unchanged at 1.345 billion bushels, soybean ending stocks for 2012/13 are projected at 130 million bushels, down 10 million from last month.

Prices for soybeans and products are all projected lower this month. The U.S. season-average soybean price range for 2012/13 is projected at \$13.55 to \$15.55 per bushel, down 35 cents on both ends of the range. The soybean meal price is projected at \$440 to \$470 per short ton, down 15 dollars on both ends of the range. The soybean oil price range is projected at 49 to 53 cents per pound, down 2 cents on both ends.

Global oilseed production for 2012/13 is projected at 463 million tons, up 0.9 million tons from last month. Foreign oilseed production accounts for most of the change with increases projected for soybeans, cottonseed, and sunflowerseed only partly offset by reductions for rapeseed and peanuts. Global soybean production is projected at 267.7 million tons, up 0.1 million. Increased production for Canada is mostly offset by lower projections for EU-27 and Paraguay. Lower soybean production for Paraguay reflects reduced yields in line with historical production and yield revisions. Global rapeseed production is projected slightly lower as reduced estimates for Canada and EU-27 are mostly offset by a larger crop in Russia. Global sunflowerseed production is projected at 35.7 million tons, up 0.9 million as larger crops in EU-27, Russia, and India are only partly offset by a lower projection for Argentina. The Argentina crop is reduced on lower area reflecting the impact of excessive moisture throughout the planting season.

Global oilseed trade for 2012/13 is projected at 115.2 million tons, up 0.5 million from last month. Increased soybean exports from Canada and increased peanut exports from India account for most of the gains. Global oilseed ending stocks are projected at 66.9 million tons, up 0.3 million from last month reflecting higher rapeseed stocks in EU-27 and Australia.

SUGAR: Projected U.S. sugar supply for fiscal year 2012/13 is decreased 266,000 short tons, raw value, from last month, due to lower beginning stocks and imports more than offsetting higher production. Beet sugar production is raised to reflect the strong start to the fiscal year. Imports and exports of sugar under the re-export programs are decreased due to the narrow gap between U.S. and world-traded sugar prices. Imports from Mexico are decreased in line with reduced supplies in Mexico.

LIVESTOCK, POULTRY, AND DAIRY: The forecast for 2013 red meat and poultry production is reduced from last month as lower pork production more than offsets higher beef production. Beef production is raised as both fed and non-fed cattle slaughter is expected to be higher and forecast carcass weights are raised. Pork production forecasts are reduced from last month as first-quarter slaughter is expected to be slightly lower and carcass weights are reduced in the first half of the year. USDA will release the *Quarterly Hogs and Pigs* report on December 28, providing an indication of producer farrowing intentions for the first half of 2013. Poultry production forecasts for 2013 are unchanged. For 2012, the total meat production forecast is raised as higher forecast fourth-quarter beef and broiler production more than offsets lower expected pork production. Cattle slaughter has been higher than expected and carcass weights remain high. Hog slaughter and carcass weights in the fourth quarter are forecast lower than last month. The broiler production forecast is raised based on production data to date. Turkey production is unchanged. Egg production is raised for both 2012 and 2013 based on hatchery data.

Red meat and poultry import and export forecasts are unchanged from last month.

Cattle prices are raised for both 2012 and 2013, reflecting strong demand for cattle through the end of this year and into 2013. The hog price forecasts for both 2012 and 2013 are raised as lower forecast production is expected to support prices. Broiler prices are raised for both 2012 and 2013 as demand has been firm. The turkey price forecast for 2012 is raised slightly, but the forecast for 2013 is unchanged from last month.

The 2012 and 2013 milk production forecasts are unchanged from last month. Lower forecast fat basis exports in 2012 reflect weakness in butter exports but exports in 2013 are raised on higher expected cheese and whey protein solids shipments.

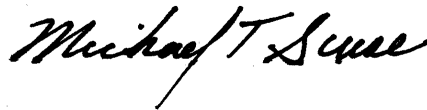

Cheese prices are forecast lower in 2012 on current weakness but the forecast is raised for 2013 as demand is expected to improve. Butter prices for both 2012 and 2013 are lowered as demand is expected to remain relatively weak. Nonfat dry milk (NDM) and whey prices are raised for 2012 and 2013. The Class III price for 2012 is reduced on the lower cheese price but the Class IV price is unchanged as the lower butter price is offset by a higher NDM price. For 2013, Class III and Class IV price forecasts are raised as prices for cheese, NDM, and whey are increased. The 2012 all milk price is unchanged from last month at \$18.50 to \$18.60 per cwt, but the range of the 2013 price is tightened to \$19.15 to \$19.95 per cwt.

COTTON: The 2012/13 U.S. cotton estimates include slightly lower production, higher exports, and lower ending stocks relative to last month. Production is reduced 190,000 bales, as a decrease for Texas is partially offset by increases for the Southeast and Delta. Domestic mill use is unchanged. Exports are raised 200,000 bales to 11.8 million, reflecting relatively strong sales in November. Ending stocks are now estimated at 5.4 million bales, equal to nearly 36 percent of total use. The forecast of 65-71 cents per pound for the marketing year average price received by producers is narrowed 1 cent on each end of the range.

This month's revisions to the 2012/13 world cotton supply and demand estimates show lower beginning and ending stocks, due mainly to a technical adjustment for Turkey beginning in 2005/06. World production is raised 70,000 bales, as increases for several African Franc Zone countries are mostly offset by reductions for Australia and the United States. World consumption also is raised slightly. Forecast world trade is increased 1.1 million bales due to higher expected import demand by China, India, and Vietnam. It now appears that two-thirds of China's 2012 crop may be purchased for the national reserve, constraining supplies available to mills.

Approved by the Secretary of Agriculture and the Chairperson of the World Agricultural Outlook Board, Gerald A. Bange, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees.

Note: Totals may not add due to rounding. 1/ Marketing year beginning August 1. 2/ Includes the following quantities of broken kernel rice (type undetermined) not included in estimates of beginning stocks by type (in mil. cwt): 2009/10-2.4; 2010/11-1.4; 2011/12-2.7. 3/ Residual includes unreported use, processing losses, and estimating errors. Use by type may not add to total rice use because of the difference in brokens between beginning and ending stocks. 4/ Includes rough rice and milled rice exports. Milled rice exports are converted to an equivalent rough basis. 5/ Expressed as a percent, i.e., the total quantity of whole kernel and broken rice produced divided by the quantity of rough rice milled. Data supplied by the USA Rice Federation. The 2012/13 milling yield is calculated using the previous five-year average-- 2007/08-2011/12. 6/ Marketing-year weighted average price received by farmers. 7/ Includes imports. 8/ Exports by type of rice are estimated. 9/ The medium/short-grain season-average farm price (SAFP) largely reflects rice that is marketed through price pools in California. The pool price is not final until all the rice in the pool is marketed for the crop year. Therefore, SAFP forecasts based on the average of NASS monthly prices and the final price may differ. For example, the average difference between the August WASDE SAFP forecast and the final price has averaged \$1.75 per cwt from 2008/09 through 2011/12, with a high of \$3.50 per cwt in 2008/09 and a low of \$0.60 per cwt in 2009/10.

1/ Fiscal years beginning Oct 1. Historical data are from FSA "Sweetener Market Data". 2/ Production projections for 2012/13 are based on Crop Production and processor projections where appropriate. 3/ For 2011/12, shortfall (259). For 2012/13, shortfall (265). 4/ Includes sugar under the re-export and polyhydric alcohol programs. 5/ For 2010/11, other high-tier (18) and other (0). For 2011/12, other high-tier (13) and other (0). For 2012/13, other high-tier (10) and other (0). 6/Combines SMD deliveries for domestic human food use and SMD miscellaneous uses. 7/ Transfers to sugar-containing products for reexport, and for nonedible alcohol and feed.

1/ Data based on local marketing years except Argentina and Brazil which are adjusted to an October-September year. 2/ World imports and exports may not balance due to differences in local marketing years and to time lags between reported exports and imports. Therefore, world supply may not equal world use. 3/ Argentina, Brazil and Paraguay. 4/ China, EU-27, Japan, Mexico, and Southeast Asia (includes Indonesia, Malaysia, Philippines, Vietnam, and Thailand).

			<i>Dollars Per Cwt</i>			
Milk Prices 2/						
Class III	14.41	18.37	17.55- 17.65	17.40- 17.50	17.85- 18.75	18.00- 18.80
Class IV	15.09	19.04	15.95- 16.15	15.95- 16.15	16.90- 17.90	17.00- 17.90
All Milk 3/	16.26	20.14	18.50- 18.60	18.50- 18.60	19.10- 20.00	19.15- 19.95

1/ Simple average of monthly prices calculated by AMS from weekly average dairy product prices for class price computations.
2/ Annual Class III and Class IV prices are the simple averages of monthly minimum Federal order milk prices paid by regulated plants for milk used in the respective classes. All milk price is the simple average of monthly prices received by farmers for milk at average test. 3/ Does not reflect any deductions from producers as authorized by legislation.

WASDE - 513 - 35

Note: Tables on pages 35-37 present a record of the December projection and the final Estimate. Using world wheat production as an example, the "root mean square error" means that chances are 2 out of 3 that the current forecast will not be above or below the final estimate by more than 0.9 percent. Chances are 9 out of 10 (90% confidence level) that the difference will not exceed 1.5 percent. The average difference between the December projection and the final estimate is 4.1 million tons, ranging from 0.9 million to 10.2 million tons. The December projection has been below the estimate 22 times and above 9 times.

1/ See pages 35 and 36 for record of reliability for U.S. wheat, rice, soybeans, and cotton. Marketing years 1981/82 through 2011/12 for grains, soybeans, and cotton. Final for grains, soybeans, and cotton is defined as the first November estimate following the marketing year for 1981/82 through 2011/12. Calendar years 1983 through 2011 for meats, eggs, and milk. Final for animal products is defined as latest annual production estimate published by NASS for 1983-2011.

Related USDA Reports

The *WASDE* report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the *WASDE* report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. For more information on how the *WASDE* report is prepared, go to: <http://www.usda.gov/oce/commodity/wasde>.

Supply and Demand Database

The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <http://www.fas.usda.gov/psd/online>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.

Foreign Production Assessments

Preliminary foreign production assessments and satellite imagery analysis used to prepare the *WASDE* report are provided by the Production Estimates and Crop Assessment Division (PECAD) of the Foreign Agricultural Service. PECAD is located at www.pecad.fas.usda.gov/.

Metric Conversion Factors

1 Hectare = 2.4710 Acres

1 Kilogram = 2.20462 Pounds

Metric-Ton Equivalent	= Domestic Unit	Factor
